Way 31st. mayen 3/4 7 ne! VI

Dear Mother, last night we skipped writing, so I'm finishing the letter now. That business with the arrangement is a stupid story, how on earth did you get involved with it? Is the grocer not going to take anything in the summer now? That is certainly a loss. I'll send you P 60 the day after tomorrow, then I'll be completely debt-free with you—I've already been debt-free with you all for two weeks, which is a wonderful feeling. As soon as I can, I'll send you money, but in the next few weeks I'll need quite a bit for 3. C. I'll think about what the best thing to do is. The ski area wasn't the only thing, but as I said, we had a decent run. Next winter we'll start skiing earlier. The gymnastics was at the night school. About the color film, it's terrible that nothing came of the 24 DM. Who took those pictures anyway? But do send me the Diola sometime, or what became of the film? Did the ones from Niagara Falls not turn out? 24 DM is an insane amount of money, even for me. By the way, I'm not surprised that there was nothing on the other two films, because they were new. They were actually black-and-white reversal films that I wanted to slip to Cläfin because I want to make color slides. All of this together is an expensive joke now, for which I'd at least like to have the film, because the falls were unique back then. The alarm clock is working perfectly, I'm so glad I got it. Of course, I always place it pretty far from the bed, but that way I get up and out properly. If I don't, I just sleep right through it. My watch, your very dear gift, is broken. I took it to the shop; hopefully I'll have it back soon. Next Monday I have to go to the dentist. I broke a filling four weeks ago, which is a real mess. First of all, I would have stayed loyal to Dächle, and second, they are so outrageously expensive here. I might buy an enlarger that I can also use for 6x6, because a good friend of mine bought a Rolleiflex. Then I also already took passport photos for Siegfried; last night I had to take some portraits for an acquaintance. Well dear Mother, now I must hurry off to the hospital,

****Left margin (written vertically):**** I'll soon be taking Täfel-Dung again for the Opielien, tested by me, I also recommend it daily.
