Work Diary - The Five Goods: 1. Good in political thought. 2. Good in love for the collective. 3. Good in productive labor. 4. Good in observing discipline. 5. Good in protecting public property.

Cheyunzhan Department Gangdizi Brigade Name: Gong Zhenzan June 27, 1966

[Source: IMG_6373_english.txt] June 22, 1966 (Sunday) Spent the morning and afternoon at the commune for a meeting (2 days) to convey the spirit of the prefectural committee, county committee, and commune meetings, and to study and make arrangements for summer seedlings, summer planting, and summer management. After returning home, first harvest the existing tobacco; after harvesting, process it, thresh the tobacco seeds, and apply topdressing fertilizer. Applied 15,000 jin of manure, and will assess the situation later. The entire production brigade irrigated 1,666.6 mu of land, wheat stubble fields. Grain crops: 600 mu of corn. Economic crops: 200 jin of small date seeds, 30 jin of spring potato seeds, 20 jin of rapeseed. Fruits and vegetables: watermelon, melon, greenhouse, Yandongmei. After harvesting, process it, thresh the tobacco seeds, and apply topdressing fertilizer. Applied 15,000 jin of manure, and will assess the situation later. Applied topdressing fertilizer. Applied 15,000 jin of manure. Grain crops: 600 mu of corn. Economic crops: 200 jin of small date seeds, 30 jin of spring potato seeds, 20 jin of rapeseed. Fruits and vegetables: watermelon, melon, greenhouse, Yandongmei. After harvesting, process it, thresh the tobacco seeds, and apply topdressing fertilizer. Applied 15,000 jin of manure, and will assess the situation later. Applied topdressing fertilizer. Applied 15,000 jin of manure. Grain crops: 600 mu of corn. Head of Household and Main Members: Gao Fu, Gao Gui, Gao Jun, Gao Yufang, Gao Jun, Gao Gui, Gao Fu, Gao Xiangguang, Wu Gengui, Gao Shunxiang, Gao Gui, Gao Jun, Gao Yufang, Gao Gui, Gao Fu, Gao Shunxiang. Youth and Five-Good Personnel: Gao Guizhi, Gao Fu, Gao Jun, Gao Yufang, Gao Gui, Gao Fu, Gao Shunxiang, Yang Jinlian, Qiao Helu, Wu Yuanwen, Bai Xiulan, Gao Gui, Gao Jun, Gao Fu. 1966.7.2. Recorded at Gao Guis residence, specifying: Guanzhuang Police Station, Chaoyang District, Beijing Municipality. Comrade Gao Gui: Go ahead and write about your work. Regarding the conflict with your fellow villagers and Fa Li and others, state the facts. Inquire about the situation with the private house of Comrade Gao Gui, which neighbors the Fourth Production Team of the Production Brigade, and the household registration. Why has the household registration still not been transferred after you filed the lawsuit? Please sueask the doctor. As for whether or not to handle itthey are not handling it. Ask if the brigade manages housing.

Directive : Publicity campaign. Make sure everyone knows. Assess the situation. Go door-to-door making home visits, publicizing to the masses. First, the two [cadres], then dispatch personnel. Production teams. Designate voter groups. Elect representatives to the People's Congress at the relevant level. A total of 48 people. Four from the production teams. The publicity must be vast and powerful, penetrating deep into the hearts of the people, ensuring it is known in every household. Ensure that men and women, old and young, are all mobilized. Ensure that those with the right to vote on election day Guarantee that the four types of elements accept the supervision of the citizenry. Afterwards, it will be discussed in a mass meeting. With the agreement of the masses, their civil right to vote will be restored. They reside in their old home in Beipanbao, Hedong Commune, in their original place of residence. Male: Pan Fulong, age 26. 2025 2328 212610 Female: 86 180.

Discussion and speeches at the Friday afternoon meeting of the brigade accountants from the commune credit cooperative. Financial and accounting work. After the summer holiday, the various administrative districts, credit cooperatives, and supply and marketing cooperatives will jointly conduct a financial review. Old Huang and Liu Mingjin said: The decision has been made to do it. Yesterday we went to the boat team. Jiang Bingshui is doing the books. San'er is settling the accounts, and some have been voided. We had a meeting at the boat team yesterday. From now on, after settling the accounts once a month, the money will be deposited in the credit cooperative. The boat team's accounts and production records are incomplete. How are we to find the old ledgers? Sun Fuxiang said that after she goes back, she will tackle the boat team first. Without strengthened leadership, it will be difficult to get it done. Settle the accounts quickly. The public security director is doing the production accounts.

Old Qiu said: We had a meeting at the boat team last night. Lü Hua and Wu Bingzhang said to first tackle the boat team, which exists in name only. Once the boat team is well in hand, all of us accountants will go over the books. We'll work on the production workshop flowers and the neighborhood committee. As we begin our work, there will be many troubles. You must support our work.

[Source: IMG_6377_english.txt] February 27, 1966 (Monday)

Yesterday, I attended a production mobilization meeting held by the production team and listened to the mobilization report from the team's leading comrades. It was a profound lesson for me. I came to realize the importance of production, to realize that production is tied to our country's socialist construction, to supporting the world revolution, and to the lives of every one of us. Therefore, I am resolved to be an active and diligent worker in productive labor, and to strive to be a good commune member. After the movement to return to the dormitories, I was made the accountant. In this work, I have felt that my knowledge is shallow; there are still many professional documents I cannot understand, leaving me with no clear grasp of things. Therefore, I am resolved to study hard and labor actively, to integrate labor with military training and theory with practice, to train myself diligently, and to become both "red" and "expert" in the countryside, contributing my own strength to the cause of the proletarian revolution. In terms of productive labor, I have been to the production team twice. The first time was in May of 1964, in the third week after the school term began. More than a hundred of my fellow students and I came here. Coming here, I thought back to before, when some people said that for me to come here

[Source: IMG_6378_english.txt] August 21, 1966, Morning (Sunday)

At the North Station loading lumber and the company delivered meat; also received and distributed *Red Flag* magazine. Also published praise for the "founding elders" amid the flowery tidbits. The seas have turned to mulberry fields; things are not what they were. They are difficult to approach, their appearance now completely changed, their thinking outdated, conservative, content to just get by, arrogant and complacent. This is the first time I've encountered their old ways. To change this old state of affairs will be fraught with difficulty. It is an ideological struggle, not an ordinary problem of work methods. It requires repeated education, repeated struggle. By studying Chairman Mao's works, we can turn bad things into good things and transform negative factors into positive ones. We are all young people, full of vigor and ideals. We must use revolutionary traditions and a revolutionary work style to mobilize the youth of the North Station and change its face. We must diligently study Chairman Mao's works, turn the North Station into a great school of Mao Zedong Thought, and do all our work well. We must do everything and open fire on the old representatives, make our voices heard, and immediately launch the campaign to oppose the Four Olds. Eight of the broad masses of employees have actively participated. Currently, the poor and lower-middle peasants, the young people, the cadres, and the typists have all been mobilized. Some people remain indifferent, completely unresponsive. In the finance and accounting section, among 9 section-level cadres and 30 clerks, two-thirds have actively participated and have all written articles. The broad masses of patriotic overseas Chinese and the families of the broad masses of workers and staff have all joined in the work. The work has been normalized and is being carried out in a solid, down-to-earth manner. A Great Leap Forward, a great burst of energy, even greater than in '58.

[Source: IMG_6380_english.txt] Afternoon, July 28, 1966 (Thursday)

Director Yang of the team branch relayed the spirit of the all-mine business and technical measures meeting, conveying the directives of Mine Party Secretary Yang and Mine Director Liu. Under the guidance of Chairman Mao's revolutionary line, the situation at our mine is excellent not just good and a revolutionary scene is everywhere. However, we must see the existing problems, for instance, in drifting, stope preparation, development, ventilation, and so on. Our drifting team must push forward with drifting work, to contribute to next year, the year after, and to the revolution in the years to come. The geology team is to serve as a good advisor; the geology team must charge to the front, serving drifting, the stopes, and development. Geological exploration must serve production, it must serve the regularization of production, it must clear the way for large-scale sideline production, and it must serve agriculture. The "three-in-one combination" must be implemented: a combination of leading cadres, technical personnel, and workers. There must be favorable conditions under heaven and on earth, favorable conditions for drilling, favorable conditions for exploratory pitting, favorable conditions for geophysical and geochemical prospecting. There must be favorable conditions for analysis, favorable conditions for comprehensive organization, and favorable conditions for reserve calculation. There must be household registration, a household account, an account holder, and an account ledger. There must be a sense of propriety, a sense of weight, a sense of grading, and a sense of classification. Higher authorities must approve entry into the reserve ledger. Where forces are weak, they must be strengthened; where forces are insufficient, they must be strengthened; where forces are scattered, they must be concentrated. The first condition for higher authorities to approve entry into the reserve ledger is that the geology team's logs must be used as the basis. The geology team must have a division of labor. (For example, dividing work by general survey, deep sections, shallow sections, surface, and underground.) We must achieve the following for each deposit: one prospected, one developed, one excavated, one sighted, one added to reserves all to serve production. Next year's must go from pit to inventory; next year's must be realized by next year; next year's must be resolved by next year. We must base ourselves in our own mine while setting our sights on the periphery, work actively, and be self-consciously revolutionary; work actively, and be self-consciously revolutionary.

[Source: IMG_6381_english.txt] Afternoon of July 28, 1966 (Day of the week)

Using our own machinery for irrigation and management, we must strive to take advantage of the current climate characteristics the plum rain season turning sunny, low rainfall, dry air, and high evaporation to create favorable conditions for the growth of crops like late rice and cotton in the border fields, while also adopting the principles of daily clearing, monthly settlement, and the Three Guarantees.

This is harmless to Shen, and will eradicate this pest situation, creating the conditions for agricultural production to achieve one high yield after another. Regarding the existing situation in agriculture, the cotton planting area is large and must be dealt with now; we must seize the time. Depending on the vastness of the soil and the varying pest conditions in each, 8 yuan, we must firmly grasp the three absorptions. Depending on our own efforts to absorb, and depending on the vastness of the soil and the varying pest conditions, we must absorb. Depending on our own firm grasp, we must also absorb, and absorb. Depending on the vastness of the soil and the varying pest conditions, we must absorb. This can be solved through research, which we have now discovered. Night of July 28, 1966

It is essential to make preliminary considerations with flexibility and maneuverability. Two points: Manage things meticulously and with flexibility. Regarding agricultural planning, land, assigning labor, and regions: we can dig wells, we can repair and dig canals so why, with the land, are there changes in ditches, slopes, and dikes, some areas not developing while others are? In some places the situation is improving, in others it is worsening. In some places the land is wet, in others dry, with fields high and low. Fieldwork must be done in the wet areas first, then the dry; the low areas first, then the high; the bad areas first (three). Currently, in the diseased, wet plots of land, we must get the grain in. There is still no way to improve the situation. Even though the fields are planted, without proper flexibility and maneuverability, it is equivalent to abandoning a large swath of crops. The former factory director, the masses, cooperative members, production teams, and so on must develop together. Industry and commerce must be integrated. We must be self-reliant, with the support of the state, and carry this out within the production teams by launching competitions.

11.66.11.10 Before, when going to Longshan to wash cars, a coworker left something of Luo Fu's behind. Out of dislike, he wouldn't let him get it back, lying that it was lost. This also involved greed. This is an inappropriate act, old Shen Shui. This is also on record, submitted as a report. Everyone who comes to my service counter is very enthusiastic, but they remember the excellent service from before. This is an inappropriate act. Everyone, including the officers, says it's not right. This is also on record, old Shen.

The commune held a telephone conference.

Cheng Guirong relayed a message from Comrade Gao of the suburban work team, who had gone to the prefecture for a meeting and called back to the village. The message was passed on after nine o'clock. The directive is to conduct a major investigation and "cleanse the sores" in the evenings and mornings, in conjunction with our work on hand. This is for the epidemic prevention personnel to report back to the commune. The content is about achieving comprehensive quality and meticulous work, not holding mass meetings of several thousand people, but finding a new approach. It involves getting the "two committees" and "two schools" active. The commune work team will help with environmental sanitation. Mistakes will be met with public criticism boards. There are to be three boards with Chairman's quotations in each area. (1) Study organizations: Party schools should have individual instruction, organize study groups, and allow free groups a variety of forms. (2) Organization: Ensure everyone has Chairman's quotations, a portrait of the Chairman, Type A and Type B editions, quotation books, single-topic editions, and excerpt editions. (3) Quotations should be put up indoors, whether they are printed, leather-bound, damaged, or wooden-framed. In addition, they should be personalized and carried on one's person, displayed inside the house and in the courtyard. (4) Number of people studying: men, women, old, young, cadres, production team cadres, team members, students, and out-of-school children. (5) Age groups: under 8, 2-3, 4-5, 6-7, 8-9, over 60, over 70, over 80. Total number of people in Party schools, broken down by men and women. (6) Various types of "red": father-son red, husband-wife red, brother red, sister red, whole-family red. (7) Various types of meetings: number of people attending symposiums and practical application meetings, the extent of outreach, and the number of sessions and attendees. (8) Landlords, rich peasants, counter-revolutionaries, bad elements, Rightists, and the "three-highs" patients, students, the elderly with illnesses, and commune members. (9) Total number of Chairman portraits. (10) Landlords, rich peasants, counter-revolutionaries, bad elements, Rightists, and the "three-highs" patients, students, the elderly with illnesses, and commune members. Flags: Party flags, national flags, banners, household flags. (11) Doors, windows, walls, and floors should each have colored fabrics. (12) Propaganda organizations: how many households are in propaganda teams, impromptu theater groups, wall newspaper groups, broadcasting groups, and blackboard newspaper groups. Household visits and traveling performances. The number of large horizontal banners. Eight households in Guanghe Village have radios. All these items must be implemented without delay.

[Source: IMG_6388_english.txt] November 20, 1966 (Sunday)

The work team and the brigade Party branch jointly studied and decided that on November 20th, every household must whitewash its walls. They will go door-to-door to inspect the red couplets. Everyone must have gone to the hot springs to burn incense, or else their pigsty will be confiscated. This is all to be completed within two days, on the 20th and 21st.

November 22, 1966

The commune held a meeting for all brigade and team committees. It began with Comrade Wang Xuan'gao, the deputy commune chief, speaking about accounting work and the financial system. He said to manage accumulation and business work well, and that the secretary should hand over the account books to Xi Laozuo to be properly managed. The standard for grain distribution must be strict; we must be masters of our own house. For whom are we producing? There must be a plan, with strict arrangements. For the good teams given to the unit, the highest yield should not exceed the "Three Fixes" standard of 420 jin per mu. Any additions are not to exceed 4 jin. Do not become detached from fodder grain. In the production team, for every person's four mu of fodder, 10 jin is allotted; the rest is to be retained. 10% cash is also required. All of the current season's production must be turned over. The production team must carry out the "four cleanups": cleaning up property, warehouses, work points, and accounts, and then report to the Red Flag Commune. The accountant will report on production and settle accounts with the finance office. Movable property is to be covered, and grain funds managed. A certificate of expropriated property must be signed. The clerk will register houses, land, and trees with the property certificate seal. 22 jin are to be used for production expenses.

[Source: IMG_6389_english.txt] November 22, 1966 ()

The Brigade collectively decided on the personnel to be dispatched to the Baguashan People's Commune for inspection: Wang Wendao, Qiao Zhengyi, Gao Changmin, Gao Changyu, Qiao Hefu, Gao Changcang.

Chairman Mao: 22 Copies of the "Three Constantly Read Articles": 11

[Source: IMG_6390_english.txt] 18th Regiment Militia: 1,500 people
December 5, 1966 (Monday)

A meeting was held for all the Youth League members of the entire brigade. The record shows Gao Zhijiang, Wu Keling, Bai Yongping, Gao Yanyi, Comrade Zhou, and Wu Xianyu of the third compilation team were present. Wu Xianyu then relayed the spirit of the symposium. Wu Juxiang made a self-criticism. Wang Yumei and Comrade Zhou described going up the mountain to plant trees and cut grass. The mountain sparrows chirped "Zhou Yu, Zhou Yu, praise!" They expressed their resolve to "fear no sacrifice and surmount every difficulty to win victory" and to do a good job in all aspects of youth work. Gao Yanju captured two soldiers and brought them back. He is determined to study. "I have studied the works of Wang Jie and made up my mind to fear no sacrifice and surmount every difficulty to win victory. I will certainly feed the livestock well." Bai Yongping introduced the facts regarding Chen Gang, Cheng Yungong, Kong, Huyang, and Bai Xiu, whose attitudes were too great, like golden flowers. "I will certainly act for the people to see and set an example." Gao Yingsheng said Chen Gang, Cheng Yungong, Kong, and Huzhong were too great, and that the militia work of Bai, Yan, and Ji was done well. Regarding how to serve the people: "When I return to the commune, I am determined to do a good job with our brigade's militia work." He mobilized everyone to vigorously study the "Three Constantly Read Articles" and manage the three compilation teams well in order to improve the militia work. "I am determined to be a dedicated soldier. From now on, I will pause twice and then make revolution for a lifetime, and read Chairman Mao's books for a lifetime." Gao Yansheng, He Rihui, and Chen Jiqiang: "Since I returned, I have seen their high spirits, their work, their production, and their processing. I am very happy." Xie Shunlin said that Comrade Tian Xiu of the Dahuanghua Brigade, Dahuanghua Commune, has done all the work that was delayed from last year. There is struggle in all work, and work is study. He studies the articles on serving the people, the "New Three Articles," and applies them creatively. For his own group's supply, production, and study, Hu Xuesheng studied "Picking the Golden Flower." On his way to Xinjí, he met an old woman carrying a large bundle. He carried it for her. She asked his name, but he did not tell her.

[Source: IMG_6391_english.txt] Evening of December 4, 1966 (Sunday)

The work I found this afternoon: study the "Three Constantly Read Articles," establish the trunk to grasp the key link. Yang Gongzi, grasp the benefits to do youth work well. Qiao Shengyi beat Chen Shenlin and Li Jinguang. On December 10, 1966, Wang Xinghai will crack down on street-corner quotations to curb this unhealthy trend. Xie Mingfu will crack down on "destroying the old and establishing the new," reforming old language with your own mouth. Gao Zhiji will take charge of household surveillance. Gao Zhijiang will take charge of mobile quotation boards and Red Flag housekeepers. Qiao Shengyi will take charge of household "little red books" and red pouches. The production team is to get the current fertilizer delivered before the Spring Festival.

Tangzhuang Commune report conveying the spirit of the finance and trade conference. This meeting was to convey the spirit of the regional finance and trade conference, to study supply and credit work. It was not handled with urgency; a telephone conference was held on the first day.

A decision was made on 1966.12.16 to start from June: Quotations from Chairman Mao, the "Three Old Articles," the accountant's general ledger, monthly expenditure breakdowns for tobacco allocation, and statistical work for the Seventh Brigade's expenditures on sulfur, iron, seeds, etc., and barefoot doctors' medicine fees. For the annual report, large livestock, irrigation canals, and epidemic prevention for livestock must be completed on schedule to avoid affecting income distribution. For oil-bearing crops, improved grain seeds should not be brought in as grain. We must still take a two-pronged approach to the total value of work. Currently, we can bundle straw. Before production, it is not to be sold outside until the end of the month to guarantee production. The meeting lasted 6 days, and the county leadership attended on the 67th. To vigorously develop sideline businesses, the price subsidies for flax and hemp are for the farm. The average grain use is four days, grain for the threshing floor is four days, grain for the threshing floor is four days. Watermelons and paper can be supplied by the factory. The person reporting, Zhan. The reporting leadership used rope for hanging things up. Since production began, we have conserved grain. Look back before looking forward, and strive to be advanced at year's end. Investigate the commune's handling of spring planting. The five hundred grains are more than the statistics; if there are any withdrawals, they will be traced to production. The issue of exchange must be resolved by the end of the month to get to the root of the matter. Hand over the warehouse to the new commune. Tangzhuang has difficulties with assigned procurement. A plan for wheat seeds has been set aside; hurry and report to the leadership. On Monday and Thursday, temporary labor for forestry, hemp, and seeds. Since production began, look back before looking forward, and strive to be advanced at year's end. Some brigades have suffered considerable losses from growing opium in production. The five hundred grains are more than the statistics; if there are any withdrawals, they will be traced to production. Seed materials have an opening date for seed materials. Then, at year's end, we will have gotten to the root of the matter. Hand over the warehouse to the new commune. Tangzhuang has difficulties and obstacles with assigned procurement. Rely on the organization. Approved by the brigade's Party committee.

[Source: IMG_6393_english.txt] Task: low standards, tight deadline, cumbersome procedures. The urgent matter concerns demobilized soldiers Li Guangde, Liu Jiben, and Fu Guiqing.

May 25th: The "Three-in-One" team's approver has provided their opinion and affixed their seal. For flood prevention, crop rotation areas, and personnel (two individuals), the late-season crop has been sown. Production funds are approved up to the maximum allowable amount. To avoid delaying the agricultural season, expenditures for the following are to be made at the stated price as usual, with the receipt dated accordingly:

Valuation Plan for the Year: Oilcloth: 100 jin Grain: 45 jin Hemp sacks: 4-60 jin (from pig procurement funds) Cloth ration coupons: 2 chi

[Source: IMG_6394_english.txt] December 16, 1966

Quotations from the Chairman, the Three Constantly Read Articles, status of the accounting manual distribution, tallying of bowls, chopsticks, and luggage, the annual report, large livestock, the irrigation channel, distribution of earnings, cooking oil and fuel, grain varieties, setting the base price for work points, what can be settled now, six-day meeting on production targets until the end of next year, the county's fixed quota for '67.

[Source: IMG_6395_english.txt] 398 jin. Dried sweet potatoes 360. Double-season 364. White beans 678,500 jin. 40 jin. Mung beans.

May 25, 1967 (Wednesday)

Secretary Sun reported on the spirit of the financial and livelihood meeting, sharing experiences on conserving grain and coal, as well as on supply. A clear policy on coal and its supply was established, and coal coupons were issued the very next day. A few people were upset at the meeting, so another meeting was held in the end, and it was decided that the issue should not be resolved immediately. Starting from June 1st, fine grains will be supplied. In Wenzhou, each person will receive 2 jin without ration coupon limits. Anthracite coal will also be supplied, and in addition, each person will be supplied with 25 jin of bituminous coal at the factory price. On the grain issue, some peoples contradictions have been exposed. Experience shows we must consider the overall situation, the collective, the state, and the disaster-stricken areas, as well as provide support for more than half a month. Those who ate the production brigade work teams sorghum must have it deducted from their grain rations. This is the struggle between two roads. Plant more public soybeans and broad beans on field margins and edges to increase the total grain output. Practice mutual aid and mutual lending, to be exchanged when the autumn harvest comes in. Do not let anyone lack grain; manage the lives of the masses. Forcibly engaging in capitalism is wrong. Avoid egalitarianism and pay attention to the case of Wang Qingchao. Grain, coal, and firewood have been tightened. The supply of anthracite coal must be guaranteed year-round. It won't do to ask for everything at once. We must study Chairman's works and establish three principles: First, grain is for unified use and cannot be divided up after passing through the three levels. Second, it is for daily planting and use; if it is used for major daily planting, there will be no way to have a surplus. To save grain, we must tackle the issue from both ends, cracking down on speculators and profiteers in things like sweet potatoes and other grains. Substitute wheat for millet. Retain some control by having personnel in charge of management and reporting. Lately, on Mondays and Thursdays, we only report on labor, afforestation, and breeding. Since production began, nothing has been reported to the higher-ups; it has been delegated to the production teams. Some production teams report on tobacco, which is not in line with comprehensive leadership and statistics. If any resources are to be used, they must be sent down immediately. Our village often holds meetings on major and minor daily plantings. When the central directive reaches our team, we must report our inventory to the former commune. Local actions must follow command, the revolutionary organizations, and the directives of the production brigades Party committee.

[Source: IMG_6396_english.txt] August 23, 1967 (Wednesday)

Currently, the team and commune have net debts, which must be reported to the branch commune. We should consider fruit trees. Huali Mountain will only dispatch 4 people from the neighborhood. The Central Commune is focusing on soil and water conservation to serve as a tactical model and properly cultivate the trees. A notice from the Central Committee of the Central Government states that important intellectual students should be cultivated to study the great direction of the Cultural Revolution, as laid out in the "Talks at the Yan'an Forum on Literature and Art." June 2, 1967

The commune will not hold a meeting for all the brigade accountants; the spirit of the meeting is to be passed down. The commune held a meeting for brigade accountants regarding the improper use of public funds. Public funds must be used appropriately. A major inventory of property is to be conducted; some accounts do not match. Opinion: Account expenditures must be independently listed and approved by the team leader, accountant, poor peasants' association director, construction committee, production team people's affairs director, public security director, Party branch and supervision group, as well as the branch and small team accountants, and the women's federation director. Grain embezzlement, loss, spoilage, 4 days of sun-drying, overproduction, wide distribution, report for duty.

August 23, 1967

[Source: IMG.6397_english.txt] May 24, 1968 (Saturday)

Team 4 meeting attendees: 24 men, 8 women, total 32 people.

A meeting was held to study the use of base fertilizer. At the "speak-and-apply" meeting for farming warriors, Xipo was given an assignment. It was decided to hold a "speak-and-apply" session on pig raising. We must go all out in making fertilizer, working relentlessly until the job is done. Shimen is to handle seed propagation. Zhengjiapo: unload the pesticides at the old mill and leave. There are 33 Iron Ox items; 28 of the bags are damaged, with some of them leaking. From Shimen, Dong Cunshen says that from now on, the two households of Gao Zhiliang will be notified about water matters, and a resolution must be reached with him about raising the sow. Liu Zhuliang of Nanhuangyu said that even if not much is harvested, everyone holds certain people responsible for this: Li Laihou, Fu Binglao, Sun Tizhi, and Gao Xiuxin. The brigades accounts must be reconciled as soon as possible.

Report on current production: There is daily progress, and the production team is to report once a day to reflect the situation. There are problems in production that some are not mentioning or are reporting inaccurately. The brigade accountant has a rule that the sub-team accountants must report every Tuesday. The current reports on crop diseases are inconsistent, with some reporting many and others few. Fertilizer: All fertilizer allocated for guaranteed-yield plots must be returned. The deadline for all of it, from first to last, is the 15th of every month. The problem of a general lack of discipline: The activists should be praised enthusiastically. People are often afraid of difficulties. If there are those who cannot go on, this is precisely the best time. If the commune has approved an allocation and there is still a shortage, it must be brought to the entire brigade for discussion to find a solution and identify the cause for him. If someone repeatedly fails to contribute to production labor, they will be assigned to other work. A lax and irresponsible work style: There are problems everywhere, yet they are sharp-witted when it comes to their own affairs. The brigade has no objections. Financial work: Accounts must be cleared daily and settled monthly. The grain distribution must match the account books. If

[Source: IMG_6401_english.txt] Note 1: For a small group get-together, there's no need for detailed planning beforehand. Teacher-and-students, eagle-catches-chick, clapping game that sort of thing. It's a state of mind where things are returned of their own accord. There were two households he was notified to return things to, and he went and returned them all. When he was at the herders place, he'd go as soon as it was mentioned. Among the herders, he was self-disciplined; among the herders, he was free. If the money was already spent, he'd get more from somewhere else. No questions asked, no trouble made.

[Source: IMG_6402_english.txt] June 16, 1968 (Sunday) According to Bai Yongping, Bai Yuanxiang was in an argument. The reason was that for the convenience of his daughters work in the team, Bai Yuanxiangs wife, Sun Youxiang, gave birth. They felt they had suffered a loss in the deal and gave Bai Yongping a piece of their mind. Sun Youxiang said: the first time, she cursed Bai Yuanxiang at night, calling him a dogs head, a diehard counter-revolutionary, supporting him, and calling him a dog. Qiao Yi, the vice-chairman of the brigades revolutionary committee, came to the team for a meeting; the content of the eight-day meeting was as follows: a conference to exchange experiences, setting up many study classes, and studying the four documents at length. Great contending and blooming, big-character posters, great debates, great inspections, great criticism, great clean-up. Great rectification, a before-and-after comparison of the great rectification, the Tangdui 8 at Shidongzi field.

June 22, 1968. The brigade organized a study session for core members: Wu Tonglu, Wu Zongxu, Qiao Kefu, Qiao Hexin, Gao Wenjiang, Yang Xuzhu, Gao Xueku, Gao Diansheng, Gao Yuxiang, Gao Lianxin, Gao Jijin, Shi Xinshan, Gao Zhilan, Gao Fenglan, Shan Zhongying, Gao Huaji, Jing Mingfu, Liang Mingyu, Wang Huandao, Gao Deqing, Gao Wenfu. Team 1: Gao Rongjiang, Team 2: Qiao Zuomin, Team 3: Qiao Zhengyi, Team 4: Gao Wenfu.

Relief Section, total received: Gao Dengxin 50 yuan, Wu Xianliang 7 yuan, Qiao Hefu 4 yuan, Gao Huake 10 yuan (cash), Luo Huaixiang 5 yuan, Bai Yuanjin 4 yuan (volunteer donation), Qiao Zhengliang 5 yuan, Gao Tangku 10 yuan (volunteer donation).

Wu Xianzhen is to collect and donate scrap materials. 10/4/68: Qiao Zhengyi, 700 catties of wheat, 700 catties of thatch, 100 catties of sorghum stalks, 200 catties of stalks. Qiao Xintai, 400 catties of sorghum stalks, 600 catties of stalks, 500 catties of Bing stalks, 500 catties of Zhuang stalks. Qiao Hefu, 300 catties of Jing stalks, 200 catties of Fei stalks, 4350 catties, 600 catties of Ding stalks. Wu Xianliang, 250 catties of flour, 50 catties of thatch, 500 catties of sugarcane, 100 catties of Zhuang stalks. Gao Huachun, Gao Wenke.

[Source: IMG_6405_english.txt] August 20, 1968 (Tuesday)

Comrade Liu from the Youcai Commerce Bureau helped our brigade with the current Struggle-Criticism, grasping revolution and promoting production. We vigorously promoted study sessions, mass criticism, and sideline production, and looked for new avenues by going all out in purchasing scrap materials. September 3, 1968

Beijing-Tianjin Highway workers, three of them. Electrician Gao Tianchun. Gu Zhilin. Gao Tangfu. Yang Jinlong. Land surveyors: Wu Guanglun, Gao Guosheng, Shi Jishan, Guo Mingyu. Xuehuangzhuang water diversion project: Gao Tili, Qiao Guihai, Gao Wenyu, Qiao Baofa, Gao Dengyi, Gao Denglai. Pigu Road: Bai Yuanjin.

October 9, 1968. Teacher Li Changsheng went to work at the Hedong Grand School, living quarters located at

Table of Collective Reserve Grain Income, Disbursements, and Inventory Over the Years. October 10, 1968. Reserve grain received over the years.

Total for production teams: 1234

[Source: IMG_6406_english.txt] September 5, 1968

Xinli convened a meeting of deputy directors and accountants from all the major brigades to organize a study visit to Sanhua and to receive the Sanzhang work team. A full committee meeting will be held on the 10th, and a four-level cadre meeting will be held on the 14th, adjourning on the 20th. Plans will be made from this winter through next spring. In preparation for war in the big year of '70, prepare the 1216 plot. The total output in '66 was 470,000 jin; in '67, it was 4,770,000 jin; in '68, the total output is 5,280,000. This year, after the autumn harvest, we will carry out a major campaign of farmland capital construction. Start early, process quickly, and advance on two fronts. Organize the labor force and make a plan to achieve one mu of high-standard terraced fields per laborer. This year, we must do autumn planting. Plow in autumn fertilizer as a base fertilizer. We must plow and plant first, without waiting for rain. Repair irrigation channels and sink numbered wells, using the supply of modern equipment. Next year, the main effort will be to open up the land from before Xiaoke to Xiaoquanke. Work on land preparation will proceed day by day. We must complete 500 mu of dry-land wells by '70, and 1,000 mu by '75. We will start raising pigs this year. Next year, each household will have 10 meat pigs and 2 sows. To accumulate more fertilizer for high yields, we must also raise sheep and improve the breeds. High-yield sorghum will be 8.3 meters. The number of large livestock will be developed to 500 head by '70 and 1,000 head by '75. Each person is to plant 100 apricot trees; each person in each village, 10 trees. We must develop dried fruit production. Plant windbreak forests and close off hillsides to cultivate forests. We need 20 tractors, a medium-sized vehicle processing plant, and fodder choppers. In '69, 5.5 million. Seeds 220. In '70, 5,750,000 jin. In '71, 2,250,000. In '71, 2.3. In every 10 years, the total output is 3,250,000. Organize well and speak of developing mechanization. Dingquan machine planting. A great development in industrial and agricultural production. For the newly built highway, 7 workers will go. Deputy Director 3, Ji the deputy. Self-provided vegetable basins will be issued as pig feed brands. To replace one portion of grain rations. For night shifts and others, more will be allocated. To replace 4 months of grain.

[Source: IMG_6407_english.txt] September 7, 1968 ()

Minutes of the Production Brigade Revolutionary Committee Work Discussion
October 3, 1968

The production brigade convened a meeting attended by all team members. The old practice of using strong laborers as a mobile workforce will be discontinued. Team leaders: Qiao Zhenggao, Wu Cunjin, Qiao Zhenglu. Accountant: Qiao Heyuan. Custodian: Gao Changsuo. Finance: Qiao Hefu, Wen Yifa, Gao Zhilan. Work point recorder: Qiao Zuozhen, Wu Wanlong. Gao Jinchun.

October 4, 1968

The Production Brigade Revolutionary Committee has decided on the work points for personnel from various units attending meetings: Wu Juzhen, Gao Changjiang, Wu Mingwang, Xie Minggao, Gao Zhiji, Gao Zhishe. Improved-seed road workers will receive 10 points per day: Gao Qiang, Bai Yuanjin, Gao Zhifu, Liu Jiqin, Liu Wenjun, Niu Donggang. Road workers will receive 10 points per day: Gao Wenchun, Gao Zhilin, Yang Jinlian. Volunteer teachers will receive 9 points per day: Xie Shun receives a monthly salary of 5 yuan. Tannery doctor will receive 10 points per day: Wu Xianzhen. Purchasing and sales manager (position unfilled) will receive 10 points per day: Gao Zhiying. Personnel who burn the brigade's coal and use the brigade's water for tree trimming will receive 9 points per day: Gao Ruiqing, Xie Minggao, Gao Jinsheng, Gao Deguang. Those who privately keep firewood. Well-digging personnel will receive 10 points per day: assigned to Team 10 for repairs. Xie Minggao, miscellaneous work gathering firewood from the bamboo road. Land-watching personnel will receive [blank] per day.

To resolve: the production team needs to establish work points for milling and weighing, and for manual sorting. From now on, the production team's accounting books must be made public. The grain accounts must be clearly recorded in the ledgers. All types of leather goods and tools, as well as the old accounts from previous years, must be checked, reported, and approved. Use white [unclear], supplement the ledgers, for use, for study, for water usage, and for cash expenditures.

[Source: IMG_6408_english.txt] October 10, 1968 ()

The commune held a telephone conference (Deputy Secretary).

Secretary Wang began by relaying the highest instructions. 9.9 anti-. Item 3: front-line. Item 4: lower levels. New item: lower levels, page 196, middle paragraph. The Deputy Secretary opened the telephone conference to relay information about the East Wind Movement. On the 12th, there will be a Commune Revolutionary Committee meeting. Committee Member Ding. He asked what shortcomings there were. There are excellent points. Take action. Tomorrow, convene the poor and lower-middle peasants. Raise awareness and have them lay everything out on the table at home. Grain is the most urgent priority. Hand it over to the state. Daily progress. How many days to finish plowing. Land cultivation. Secondary matters. Some land that has not been harvested has been reached. Explain the multi-year plan at the meeting. Prepare the grain. Fertilizer. Prepare the land with the intention of afforestation. The revolutionary situation. The great criticism, struggle-criticism-transformation. Fertilizer materials. Go over the fundamentals once. Steps. Vice Chairman Lin's speech on the 19th anniversary of National Day Party discipline. Victoriously advance on the foundation of the proletariat. Arrive at the meeting on the 12th at 9 o'clock. Anhuaxingli. Grain Bureau. The poor and lower-middle peasants should raise their awareness and submit opinions to the commune cabinet. The production team should pick up the high-volume loudspeaker, 40 yuan. Our production brigade has no water and needs to haul it by cart. The commune has decided to go to the west of the Dongfeng highway for 40 days. The water shortage in our production brigade has still not been resolved. Livestock from Laojiaji have damaged our production brigade's trees. The commune's plan for planting trees and afforestation, we will raise this with the commune. The commune will come to resolve it. Workers' wages for the Xuehuangling water diversion project. The commune is not allocating funds, so the workers returning to the team have complaints.

[Source: IMG_6409_english.txt] October 12, 1968 (Saturday)

Morning shift. Morning at the workshop. 8-9 AM: "Dictatorship of the Proletariat," Week 1. 4. Brigade-wide mass criticism session. 5. Dazheng Labor Committee, 6.

1968.10.13: Last night a meeting of all parties was held (Standing Committee Member Ling spoke) to lay out specific work assignments. The work for the second half of the year was assigned. The experience of the Xianjialing area of the Xipo Brigade was presented. We assessed the state of Chairman Mao's door-to-door propaganda implementation in our brigade. The harvest was quick, the shortcomings were minor. We achieved "grain in the caves." Communication is poor. Some team leaders do not ask for instructions, do not report back, do not ask when they don't understand. Put politics in command. Study and apply creatively. Use Chairman Mao's latest instructions. Continue to run Mao Zedong Thought study classes. Report to the brigade leadership. Drag out the bad elements. Establish models; Sui County will hold a major conference in January 1969 to recognize them. Dare to smash the "money in command" and "rampant self-interest" mentalities. Only then can we succeed. China's Khrushchev promoted a reactionary way of farming. The state is to get a clear picture of high-yield crop cultivation. Turn the production team into a red flag of production. Therefore, the production team's private harvests are to be given the team's official stamp for the team members. After December 28th, grain usage will be determined by estimated grain output. Report the grain plan to the commune before the 18th. Calculate the yield of several crops. The seed quality is good. Calculate the average for the second report. The valuation will be based solely on the amount you report, no more and no less. Calculate the yield per unit and the total yield, neither with decimals. Calculate the total work points.

[Source: IMG_6410_english.txt] October 14, 1968 (Monday)

List of Activists in Studying Chairman Mao's Works Team 1: Sun Xiangui, Gao Jishun, Gao Jilan (female), Qiao Xiuying, Wu Xianling, Wu Baorong Team 2: Bai Yongzhi, Gao Zhijiang, Liang Zhongying, Liang Jucai, Liang Juhai, Gao Jifeng, Lu Yuhua
October 15, 1968

At 11:00 PM, after hearing Chairman Mao's latest directive from the factory radio, we gathered all the platoon members at the brigade to study the latest directive. We held a parade with a clamor of gongs and drums. The army unit set up a mimeograph machine in the instructor's room and copied 63 copies of the latest directive.

October 18, 1968

The brigade held an enlarged standing committee meeting and a meeting of activists in the study of Mao Zedong Thought to convey the spirit of the commune meeting. Comrade Wu Xianling said that the big push in forestry production is not insignificant, and the losses have been very large. There is no problem with the core group's struggle-criticism campaign; what was done before was too general and did not have a broad enough impact. Rapeseed: 38 branches. October weir repair: 3,100 jin. Ephedra tower stakes: 2,244. Grain stubble forest: 58.4. Cloth shoes: 60 points for Hai. Gao Jiye: 150. Water conservancy fund: 400 yuan. Straw-cutting task: 22,000 jin.

October 20, 1968

Exempted from the Lower-Middle and Poor Peasants' School: the Mao Zedong Thought propaganda team. Team leader: Xie Mingfu. Members: Jianzhong, Gao Zhijiang. Women: Gao Zhilan, Shi Gongshan, Wu Baorong. Well digging: 6 people. Dry well digging: 10 people. Land preparation: 44 people.

[Source: IMG_6411_english.txt] October 21, 1968 (Monday)

Meeting for requisitioned Educated Youth on studying the works of Chairman Mao. Testimonials from the Zhuhai Municipal Revolutionary Committee Political Department and the West District People's Armed Forces Department. The latest situation in Hong Kong, a private factory caught fire in the middle of the night, we handled it very quickly. We handle things well in normal times too. First, bathing, then participating in production every day, working overtime in the morning and evening. No questions about labor protection pants during the testimonial session. First is study. When it came to cleaning out the class enemies, my thinking wasn't clear. When the criticism began, they struggled against Chen Yunxiang. I connected this to my own situation and put myself out there. By putting myself out there, I raised my consciousness and overcame the big-character posters. What to do? Xie Yuanlong passed on the message. The testimonials on studying were very good. As for life from now on, 80 points, I will learn from this. Liu Youfu's testimonial: in the first half of the term, who used Commune Director Zhao Zaijin to give my accounts back to me after they were collected? I was unhappy about this. Wang Aixiang's testimonial: I didn't care about my work duties before. Through study, I have now taken them up. Luo Chunlan, Shi Zhengming's testimonial: I worked until I was opposing the use of the "taking root" line, and in the end, I was put out there. Lu Biao, Nongfang Zaili's testimonial: very busy with work duties and study. Requisitioned to actively study and think, give testimonials. Regarding the Five Black Categories, we must grasp this tightly, break out of the circle of routine affairs. Don't just let the cooks know; the two categories of red masses must unite, follow the general direction of Jiang's testimonial, and not change stations midway. A meeting was held in the middle of the night on October 22, for the sales agents, to report to a meeting at the He Xian Supply and Marketing Cooperative. The meeting was at two in the morning. On the 23rd, one person was sent to the front to find Xie Yuandiscovered the factory committee's deputy director, Zhuguang Mirror Factory committee...then

Guo Cong brought up that some people have been saying that whether you study or not, its still the same old thing of working for two days and being off for two days.

Misappropriation and abuse of credit has led to chaos. The accounts must be made exceptionally clear; procedures and IOU slips must be cross-checked multiple times, and the remaining cash balance must be reconciled. Some people take money without leaving an IOU, or even without writing a receipt, taking advantage of the reconciliation process.

On October 23, 1968, I went to the commune to attend a meeting conveying the spirit of the Central Committee leadership and the study of Mao's works. The meeting is scheduled for three days.

The meeting to convey the message began on the afternoon of the 23rd. Yao Yunyuan spoke, relaying the students' discussions and aiming to unify the students' will, their next steps, and their actions. Some have broken into the granary, some have occupied public property, and some have been incited to steal. Some have misappropriated tuition fees, which is unacceptable. An IOU was issued, and the shortfall was investigated and returned. Workers were brought in to clear the accounts, and finance personnel were brought in to clear the debts. On October 24, 1968, the Mao Zedong Thought study session came to the brigade for a meeting attended by workers, transport staff, peasants, and political and commune cadres. October 25th.

At the brigade study session, Yang Zhidi gave a speech on an article about living application, connecting it to the major problems existing in the brigade: not listening to the commune, not listening to the brigade, replacing the old with the new, and eradicating selfishness. We must take the initiative to serve the Chinese people completely and thoroughly, put a stop to old traditions and unhealthy tendencies, and, like Wang Jie, Hou Wanglu, Liu Hulan, and Ouyang Hai, eradicate selfishness and establish merit, achieving the goal of criticizing and struggling against the self.

[Source: IMG_6418_english.txt] Year Month Day (Day of the week)

The farming plan is two primary and one backup. The total cultivated area is 6,000 mu, with 2,500 mu plowed by oxen. For draft animals, 240 mu per hectare. There are 180 sows and 80 meat hogs. 650 bulls. The chemical fertilizer was received by the team on credit; after accounting for write-offs, 280 were sold. Spring wheat, 70, with at least 1,000 jin of grain. Short-stalk millet, 4 chi, 1,000 jin from the land. All edible fodder and grain was sold off, so payment cannot be made for the new quarter. The American funds portion can be implemented on a weekly basis, only repaying the animal husbandry portion without submitting grain. All of his grain is used for turnover. Oilseed planting was improper. Supervision work is good. Fulfilling tasks, grain rations are based on the average for the entire brigade, with 10 percent for livestock and poultry. On November 1st, the blasting of the land was announced. The leadership tasks and grain restoration tasks are in accordance with policy. Sun Yucheng 6,000 jin, Cao Pan Zhi 10,000 yuan, Liu 280, Huoxiang, Xiazuozi 12,600, Xizhang 10,000 jin, Xinzhai 19,200 jin, Sun Jingting 23,000, Shangzuozhi 43,500, Xizhang 20,000 jin, Sun Jing 21,200, A 14,600, Huo 12,000, Xia 13,000. 1968.11.7

List of names of poor and lower-middle peasant households with difficulties, with approved distribution amounts to be implemented: Qiao Yuliang 20, Qiao Yuman 5, Gao Jixiang 10, Gao Deqing 10, Gao Delai 5, Qiao Zhanfu 10, Sun Changgui 5, Sun Chanshan 5, Wu Jujin 5, Gao Haiming 5, Gao Keku 10, Wu Juzhen 10, Gao Deheng 10, Gao Haigui 5. 95 yuan. 1968.11.20

After discussion, it was decided to send Gao Wenjiang and Yang Jinying of the team to report to the branch cooperative.

The brigade convened a meeting of Party members and activists to communicate the decision regarding the *Draft Constitution of the Communist Party of China*, which was passed by the Enlarged Twelfth Plenary Session of the Eighth Central Committee on October 31, 1968. Party members and activists studied the communiqué, and the matter was ultimately discussed.

On the night of November 25, 1968, Chairman Maos latest instruction: Historical experience is worthy of our attention. A line and a viewpoint must be spoken of every year, spoken of repeatedly. It is not enough to speak of them to a few; they must be made known to the broad revolutionary masses. On the night of November 28, 1968, Commune Director Zhang instructed the brigade revolutionary committee that it must handle both sides well, possess a revolutionary spirit, and thoroughly eradicate the characters for "fear," "self," and "difficulty."

[Source: IMG_6423_english.txt] November 29, 1968 (Friday)

The brigade convened a meeting of the poor and lower-middle peasants. The representatives of the poor and lower-middle peasants and the school teachers held a meeting to calculate work points, discussing and deciding on the teachers' point allocation. For each *pangjiao*, the cash value is 15 yuan. Li Wenyue is to teach the middle school class. Gao Huaqun and Qi Tingliang were each evaluated for 7 work-points. Those with better economic standing: Gao Huahui 10 yuan, Qi Tingliang 10 yuan, Gao Deqing 15 yuan, Zhu Julian 10 yuan, Gao Tingcai 5 yuan, Sun Chuanxiang 8 yuan, Wu Jin 10 yuan, Gao Benrong 5 yuan, Gao Diangui 10 yuan. The teachers will also be paid at the end of December. The chemical fertilizer resale store will open its doors to sell goods once every three days. Directive issued on November 30, 1968: The Second Production Team is to distribute the grain rations for December. For 940 jin and 184 people, each person gets 1 jin per day. Within this, 120 jin are for two people, Gao Xuefu and Yang Jinhua, for 2 months. On December 5, 1968, the commune convened a meeting of all brigade accountants regarding grain production, consumption, procurement, and supply, and other various matters. Starting December 1, the procurement of dried grass must be completed for each item; one cannot do their own work. Report on Sunday. Teachers will not have meetings for now; the situation remains unchanged. The militia is to be established and will hold a centralized meeting. The number of laborers for land processing is 50%. Relief funds must be properly allocated and reported to the higher-ups.

[Source: IMG_6424.english.txt] The unit short on provisions, with 325 to 340 jin, is Company 340's provisions unit. 340360 is the army provisions unit. Around August, it's the unit short on provisions.

[Source: IMG_6425_english.txt] December 14, 1968 (Day:)

The production brigade held a poor and lower-middle peasants meeting. It was decided that teachers would have their wages settled monthly at 15 yuan. Based on work points, this would be leveled out each month at the production team. For the two established households, any leave to return home must be approved by the standing committee; those who overstay their leave will be cleared out. Commune cadres: Sun Jiwen, Wang Xizhong, Hou Yuzhou, Cheng Jifu, Hou Ruixiang (Liu Fugui), Hou Zhihai, Jiang Biying, Hou Yongli, Zhao Cunjin, Hou Xuezhong. Proposals to the masses of the production brigade of poor and lower-middle peasants:

1. The higher-level leadership must resolve the water shortage as soon as possible.
 2. We request that the higher-level leadership resolve the electricity problem as soon as possible.
 3. We request that the higher-level leadership allocate one tractor to our brigade in the spring of '69.
 4. The higher-level leadership needs to study and consider our brigades very low allocation of coal for charcoal.
- January 12, 1969

The commune convened a meeting of the accountants from all production brigades to properly handle the year-end financial statements, to properly control the personnel sent down to the countryside, and to properly select the power-holding groups. The groups for poor and lower-middle peasants must not be left out again; they must be supplemented and investigated. The approval groups must vet the cadres and the brigade's standing committee. Henceforth, we must get to the bottom of things. When recruiting new members, we must also investigate their histories clearly. The regulations for handling sold goods will be changed. We must get to the bottom of things and prepare materials: the individual's situation, the facts of their crimes every point must be recorded clearly. Report this to get the opinion of the masses, then get the opinion of the small group, and the opinion of the brigade's standing committee. Go through the individual's self-examination and investigation, the masses' feedback, the "three verifications," and the "three implementations." Their performance during the Great Cultural Revolution must be verified.

[Source: IMG_6428_english.txt] Sunday, [Date] of [Month]

A meeting was held at Hengban. A 20-year-old, one of a three-person team, a lab technician, was selected by the commune to go to Wenzhou for training. They were given one jin of grain ration coupons per day. For the other 8 days, each small team was assigned one work-point. [unintelligible]

[Source: IMG_6429_english.txt] January 29, 1969 ()

Learned that two individuals from the masses joined the army in '43 at the age of 17, enlisting without being regular soldiers, and served as communications personnel. The first enlistment was for three years, the second for one year, and then went to Yishan to volunteer again, but was discharged due to illness. Total cooperation. Relief funds disbursed on January 27, 1968: Qiao Tinggui 5 yuan, Gao Nengke 5 yuan, Gao Deqing 4 yuan, Sun Xianxiang 5 yuan, Luo Jin 5 yuan, Gao Xigui 5 yuan, Gao Tingcai 3 yuan, Gao Tingyu 3 yuan.

Class Struggle Investigation Group, dispatched February 4, 1968: Liang Mingji, Ma Liancai, Gao Shike, Gao Huji, Gao Deqing, Ji Zhaojin, as well as Gao Ximing and Bai Yuanjin. Deceased are Qiao Tinggui, Qiao Zhengyong, Gao Zuoshun, Yan Jihong. Yige did not join. Gao Huji, Gao Youjiang, Qiao Youyuan.

Chief Gao reported the facts to the masses at the assembly. Chief Gao said: I joined our army in '45, then deserted and became a puppet district head for the Second Bao. I re-entered the puppet district at Yuancun, had a gun, and fired it. Zhang Yun, who was connected with me, brought me fooda counter-revolutionary. The masses handling of the bad elements confessions is very good, very thorough; the only wish is that they be treated as traitors but not given a formal cap, leaving their fate in the hands of the masses. He said: In '45, I took refuge with someone completely apolitical, then ran to Guanshan. I was beaten many times. After running away, I came back from Guanshan. The nature of this is that of a traitor. Everyone, have me undergo labor reform. The masses handling of the bad elements confessions is very good, very thorough; the only wish is that they be treated as traitors but not given a formal cap, leaving their fate in the hands of the masses. Wang Wenfu: I joined our army in 1944. In '45, I deserted, taking two guns and a small mortar with me when I returned. I then went over to the puppet forces for reorganization. In Guanshan, I served as a platoon leader for a time. I truly did not kill anyone. The nature of my actions is that of a traitor. The masses handling of the bad elements confessions is very good, very thorough; the only wish is that they be treated as traitors but not given a formal cap, leaving their fate in the hands of the masses. The three individuals above expressed their determination, accepting Chairman Maos instructions, to make revolution for Chairman Mao through labor reform under the supervision of the masses.

In the afternoon, general historical issues. Gao Tingyi, Gao Wenke, Li Mingfu, Wang Aodao, Bai Yuxi, a deputy director, Qiao Zhengyi, and Shi Mo gave reports, relaying Chairman Maos teachings to do a good job of preparing for spring plowing. They will dig deep and search carefully for class enemies among the landlords, and organize a "three-olds" committee of 5-7 people. They will reform the Party, follow the class line, form an investigation group, and run various types of study classes. They will manage labor, be frugal for the Spring Festival, and launch a major sanitation and autumn manure collection campaign.

[Source: IMG_6433_english.txt] February 11, 1969

Push production forward. Current production tasks: sow wheat and harrow the fields, dig wells, sign contracts, make plans for planting seedlings, and prepare for spring plowing, as well as work on non-urgent land for the South-to-North Water Diversion project. Handle the small details well. Income was low in '68 and the grain levy was not high; we must do better in '69. For medical care, please report your illness; treating it is what matters. Being illiterate is a great disadvantage. Some people make trouble in a very bad way. First, they don't go for checkups, letting minor illnesses develop into major ones. A small ailment, left untreated, becomes a big one, which is a local failing. As for others, they come with ulterior motives. Everyone on duty must be vigilant and guard against these hidden troubles. 3/1/1969: Disbursed 50 yuan for teachers' grain rations, 30 yuan for home-shaking subsidies, and 15 yuan for living subsidies. Li Qingfa received 150 yuan, Gao Wenxiang 115 yuan. 3/13/1969: Public accumulation funds were proposed. The well-digging team includes Chen Guirong, Liu Fugui, and Hou Aigan. Funds to be raised by the end of March. 1. Raise money to organize the class ranks and conduct the elections properly. 2. The distribution of money will be reviewed and approved by the masses. 3. The history of the class discussion front. 3/21/1969: Distributed vegetables to 6 people from the water diversion project. Total workforce: 169, with 113 male laborers and 56 female. 4 people assigned to tree trimming. Plowing worker Gao Yingfu left on March 26. 10 people assigned as cooks and support staff. 8 people as cart drivers and assistants. 16 people assigned to dig dry ponds. 2 people as teaching staff. 1 person as a fertilizer sales agent. 87 people in total.

[Source: IMG_6434_english.txt] March 21, 1969 (Friday)

On April 1st, construction workers are to receive six months of substitute grain. For the northern fields, half the seeds. For the project start-up, half. For the late rice, Yibaochang will allocate 1,080 jin of subsidized grain for the workers transferred to Xuehuangling. To be allocated from the provincial department's grain depot. Work stoppage plan.

Wu Juzhen, Sun Jinwen, and Qiao Daoyi are to manage production and finalize ticket arrangements. Gao Zhiqing, Gao Zhijiang, and Gao Zhixian are responsible for class-related work. Liang Mingji, Gao Zhixian, Nie Huaying, Liang Juzhen, and Xie Mingfu are on later-stage Party building work. Liang Juzhen, Qiao Zhengcheng, Shi Shun, and Shi Zhengshan are on the Jingfang PLA study group and daily life work. Qiao Yuanyuan, Nie Huaying, and Nie Xiazhong are on the propaganda and training district, reporting, and grain collection. Meet every evening to summarize and report, collect materials, and report on production daily. Economic audit, worker verifications. The Mao Zedong Thought Propaganda Team: Xie Mingfu, Liang Xianzhen, Gao Lihou, Gao Zhiqiang, Run Tai, Wang Rong, Gao Zhiqun, Gao Zhixian, Bai Yuanjin, Wu Jinshuang, Qiao Jinhai, Cheng Guangliang, Qiao Jinshun.

On March 25, 1969, the commune convened a meeting of all brigade directors and accountants to communicate the warming trend of reversing the verdicts from the Four Cleanups Movement. Wang Rong announced the movement. Lower-level cadres are in turmoil. Secure fertilizer. Apply 4 jin of chemical fertilizer per gong. Implement the Central Committee documents. Greet the victorious opening of the Ninth Party Congress. Greet the proposed opening of the Ninth Party Congress with practical actions. Planned vegetable fertilizer is 11 jin. [Garbled text] class issue discussion and instructions published, total 102. 3/25

[Source: IMG_6435_english.txt] Study Class for Activists from the Middle-Peasant Production Team on the Study of Chairman Mao's Works, discussion from March 26, 1969 (Wednesday) The commune has assigned the planting of 1,300 trees in Xiangtang and is releasing reserve grain. March 27, 1969 Decision made after review, discussion, and deliberation by the preliminary party member representatives, team leader groups, the Revolutionary Committee, mass meetings, the poor and lower-middle peasant association, and symposiums. Existing problems: a minority of commune members are still ideologically resistant, saying this won't work and that won't work, refusing to do anything or show up for work. Therefore, certificates were issued. Political mobilization has been poor, relying on high pressure, high targets, empty promises, empty meetings, posturing, and inflated prices. Detached from the masses. Digging has stopped. Work on cleaning up the class ranks: the conditions of the front line are not understood, the state of the situation is not understood. Directives from the Third Plenary Session of the Central Committee were well-communicated, and activities have been launched with a good grasp of the situation, but performance at the grassroots level has been poor. March 31, 1968 The director of the Guoyuanzhuang Brigade said that for digging a well from Waisun, each person in the following generation of the brigade will be paid 5 jiao per cubic meter. From Yebai to Shatuo, 8 jiao. From Shatuo to the old pump station, 1 yuan. Beijing cloth costs 1 yuan 3 jiao 7 fen.

Households: 102. Population: 398. Male: 220. Female: 178. Poor Peasants: 48 households, 188 people (103 male, 75 female). Lower-Middle Peasants: 7 households, 19 people (12 male, 7 female). Middle Peasants: 19 households, 86 people (47 male, 39 female). Upper-Middle Peasants: 7 households, 27 people (14 male, 13 female). Rich Peasants: 3 households, 5 people (2 male, 3 female). Their Children: 15 households, 73 people (34 male, 39 female). Landlords: 2 households, 5 people (4 male, 1 female). Their Children: 1 household, 5 people (4 male, 1 female). Total: 102 households, 398 people (220 male, 178 female).

[Source: IMG_6436_english.txt] March 31, 1969 (Day of the week)

In the evening, there was a conference call. Wang Qingchao spoke about the spring afforestation conference, a year of work to celebrate the 20th anniversary of the founding of the nation. Down with the traitor Liu Shaoqi. July 18 is when the Soviet revisionists invaded our country's Zhenbao Island. Down with the new tsars. Make the motherland green, plant trees, prepare for war, and defend Beijing. The two mountains north and south of the city office are old revolutionary base areas. The areas along the railways, roads, and canals must all be afforested. Be unseen by day and show no fire by night; let vehicles move without being seen. Defend Chairman Mao, defend Beijing. Manage soil and water erosion well and repair the Shimen Reservoir. Timber is needed for the national defense frontiers. Cypress can be used for incense materials. Phyllite is of great use, and can also be used for burning with coal. In this year of victory for the Great Cultural Revolution, we will accomplish 80% of the afforestation task. This is the supreme command: grasp revolution, promote production, fully implement, and firmly grasp class struggle. The great significance of large-scale afforestation is to prepare for war and prepare for famine for the people. Break through sluggishness. Workers, peasants, students, and teachers, lively and active, prepare for afforestation on every mu. The struggle between the two lines. Living study and living application of Chairman Mao's great theories. There are about 13,000 people. They won't take grain or oil, they want treeswalnuts, jujubes, papayas, soybeans, etc. For pests and diseases, go up the mountains. Men and women, old and young, all mobilize again for afforestation, for the rear, for protection. Starting April 1st, until the 10th. Red flags everywhere, leadership groups everywhere grasping typical examples. Communist Party members emphasize the two words "policy" and present this as a gift to the Ninth National Congress. Fan Rongquan spoke, relaying that the district committee's on-site afforestation meeting will be held in Huairou County on the 28th, 29th, and 30th of the month. Report back, run study sessions in a big wayrun study sessions in the fields, at the work sites. Discuss, do a good job of class struggle work at the work sites. Mobilize the classes. There are quotation boards, red flags, and blackboards at the work sites, and there are cultural propaganda officers.

[Source: IMG_6437_english.txt] April 4, 1969 (Saturday)

Hired poor and lower-middle peasants to manage work. For the pact on watering and protecting the forest, the person in charge of grazing livestock is responsible for discovering any damage by said livestock. For damage to 1 fruit tree, a fine will be levied. If livestock eat grass without being put out to pasture, the penalty will be to replace it with three times the amount. For damage to a young seedling, the penalty is to plant three and ensure they survive. If a household's penned pig gets into the fields and causes destruction, the young people must come out to work and hand over 20 jin of fertilizer, not to be left overnight. Commune members are not allowed to take shortcuts on the small paths; whoever does will be docked one day's worth of work points. To be implemented by the Number Two Production Team on April 8, 1969. Regarding the pigs from Xiangdonggou, as per the new regulations, 20 jin of fertilizer must be handed over. Gao Mengyun was docked one day's work points for being on the middle-peasant street. Commune members: Guan Zhu, Gao Mengyun. For walking on the path: Gao Shengchun, Gao Wenping no work. Livestock in the Shuishen garden pigs. Witness: Zhou Tai. On April 14, 1969, a meeting to combat private interests was held yesterday, a struggle session. Criticized the twenty bandits. Wan Nian is considering that the team's new livestock and peasants are in a bad and rotten state, having privately started threshing in the autumn; single wild ambition inflated. On April 17, 1969, for the Meiyu Water Diversion Project, 100 points per person per meter of work. In '66, it was over 100 points per person. The collective planted 562 clusters of trees. Half the brigade planted 200 clusters of paulownia trees. Noted by: The Party Small Group. On April 17, 1969, commune members: Li Huaying, Gao Huashou, daily work. Orderlies get an additional 3 points of work. The elderly formed a team.

[Source: IMG_6438_english.txt] April 16, 1969 (Day of the week:)

At the commune, listened to a Party committee telephone conference (Director Wang speaking). 1. Carry out the work of finalizing cases. Cleanse the class ranks. First, grasp it firmly. Second, address tendencies toward commandism, etc. 2. Comb the mountains and cleanse the communes to do a good job of Party work. 3. Carry out the work of finalizing cases. Have a high level of awareness. Implement the policies. The leadership team. A high-level official is coming to the commune for a talk. Set up a study session. The people whose cases are being finalized must attend the study session. Let them lay down their burdens, recognize their crimes, and draw a clear line. Grasp typical cases and summarize the experience. Don't make people have misgivings. Finalizing cases is the mass line. No commandism. Mobilize the masses. Use cases to educate friends of the class. A policy of leniency. Make the Party spirit clear. 4. Speak of the concept of class struggle. The living study of the "Three Constantly Read Articles." The various behaviors during the movement. The individual's own history, if any. What the masses have reported. 5. A notice about the work arrangements for the three levels. A meeting will be held on the afternoon of the 17th.

1969.4.17. In the evening, the propaganda team convened a study session for the brigade standing committee. 10 people attended. 3 people were absent. Those who attended were Zhao Yi, Gao Zhiqing, Gao Zhifa, Qiao Zhinian, Qiao Lianyong, Gao Deqing, Gao Deheng, and Luo Mingli. Those absent were Wang Zhen, Dasuan, and Xie Mingfu. Came to Huai for the meeting: Gao Chunjiang. Went to Beijing to see a doctor. Also present were Wang Dehai, Gao Yunxiang, and Qiao Xueyun, who spoke. The great significance of The province first spoke of the general situation, the situation of criticism and discussion. 1. The study session standing committee. Increase production. Therefore, the situation of the brigade. As soon as its issued, its collected. Discussion. Cotton planting quotas must be followed. Settle down. On-the-ground production. The small team. Using Mao Zedong Thought. Not afraid of hardship. Overcome temporary difficulties. The study session standing committee. Work during the day. Discussion. Summarize experience and the current situation.

Men: 1 outstanding, submit all backdated items. Women: 4 outstanding, submit all. North Market department to supplement. North Market Gao. Xi Gao Wenzhen. Xi Gao Shizong.

[Source: IMG.6439_english.txt] April 30, 1969 (Tuesday)

An expanded joint meeting of the two committees for the Fifth Plenary Session of the Commune. To creatively study and apply the spirit of the meeting being conveyed. Four comprehensive reviews. Thirty-eight have now been finalized. Fourteen have been criticized. Four have been proposed. Conclusion. Deliberation. Requires approval from the Central Committee. The situation regarding the two cases and the line struggle.

The Central Standing Committee has repeatedly studied the case and given instructions. The report was to be conveyed before the Ninth Party Congress. After the Ninth Congress, a meeting will be held. The Vice Chairman, Vice Chairman Lin, all agreed. The problems accumulated during the Cultural Revolution will not be addressed. The Ninth Congress will be held within the Party Committee. The revolution must have a new posture. Achieve new merits. Go into battle with a light pack. Those who rake up old scores have been at it for a long time. It is certainly difficult to verify the facts, and their enthusiasm is low because of strong factionalism. Some do not recognize the need to study and dig up materials on the enemy. Within the Party Committee, the materials were studied and re-studied eighteen times. Over and over. Repeated study was not enough. Like excavating files. The materials on Liu Shaoqi are over 40 volumes. More than 40 copies were made. How the materials are arranged. Be absolutely sure not to let your attention be drawn to embellishments. For the dead, it's best to be final. Like Liu Shaoqi. All materials must be printed out for verification. After this is finished, get rid of the reactionary materials. For important principal offenders who have fled abroad, these are major criminals. The key is to be precise. Pursue them to the very end. Capture them and bring them to justice. This also counts as bad elements whose cases have not been settled. Active counter-revolutionaries. Can be handled with less than historical cases. Need the heinous ones, those that can illustrate the nature of the problem. We must focus on external investigations to finalize cases. Focus on the facts of the case. The facts of the case must be precise and damning. This is a very big, very important task. Some materials are like stones, they don't move a person's lips. When you go looking for testimony, don't you want to get good testimony?

[Source: IMG_6440_english.txt] April 30, 1969 (Day of the week)

Bravely take on the tasks assigned by superiors. Materials should be direct and to the point; one must study them diligently. The conclusion should come at the beginning, explaining the issue in just a few words. The main thing is to let the facts speak for themselves, to be clear and forthright. Gold will always shine. Say what is pertinent and cannot be distorted. Be clear and forthright; a few percentages can make things clear at a glance, so people can keep reading. If all the materials are long, it's a headache; you get a headache just looking at them. There must be a lot of materials, with facts to elevate them. Just investigating without researching is not enough; it must be combined with reasoning. As the saying goes, the work of preparing materials is crucial. Without understanding, one cannot go deep, and will end up picking up sesame seeds while leaving behind the watermelon. One cannot be impetuous; what matters most is attitude, understanding, theory, and determination. One must make more comparisons. When reporting on materials, don't just look at the strengths; look at the weaknesses too, to further elevate the experience. One must have understanding and dare to take responsibility. If there is no problem, it is wrong to insist there is one. Do not carelessly pin labels on comrades. When reviewing materials, one cannot engage in simplistic theatrics. In your understanding, you must grasp the main theme. If you can make things clear in three sentences, the significance will be great. One must regularly let the slow cart pull the heavy load, reviewing old materials. Do not carelessly pin labels on others. One must have the courage to be backed into a corner, to wade through boiling water. Be bold. Throw in a percentage; when presenting facts to reach a conclusion, you must rely on the facts to do the talking. Dare to debate with anyone. It is mainly a matter of understanding what you are looking at, the terrain, the victory. The conclusion must rely on an abundance of effective information to be able to stand. Do not discard what is important.

In work-related debates, the main thing is to grasp new things, new experiences, new creations. Do not cover up shortcomings, do not nitpick, do not point fingers. Be open with each other. If your health is not good, you cannot get angry; live a few more years. You must speak with patience, with reason, with high standards, with facts, and with understanding. It is because one is influenced by the other party's viewpoint that one should... analyze it with a certain inclination and propose a few views.

Reviewing experience materials, explaining and demonstrating the work.

One must take the initiative to ask for guidance. Everything must undergo scientific analysis to ensure it is the main theme. Grasp the main theme, and you move the whole thing. Guarantee it, and grasp it firmly, to achieve a new understanding, a new level, a new experience.

.....

[Source: IMG_6441_english.txt] January 30, 1969 (Thursday)

Enlarged Meeting of the Central Military Commission

Kang Jian, You Tao, Wang Bin, and Zhang Weifan spoke about the four documents and put forward several requirements. Center everything on Chairman Mao. It must be clearly understood that the political line is correct; there must be no wavering. When studying, transmitting, and discussing the materials, there will be contradictions. Handle this first within the Party, then outside the Party; first among the leadership, then among the lower ranks. Clarify what is primary and what is secondary. The nature of the matter is counter-revolutionary. The attitude must be steady, not impetuous, and there should be no fighting. Recognize the trend for what it is. Conduct research, discussion, textual investigation, and verification, and this must be combined with the masses. The materials must be kept top secret. Do not add to or subtract from the materials; find good things to use against the anti-Mao scoundrels.

The Central Committees Nine Principles for Rectification: Center it on Chairman Maos thought. The Party committee secretaries must personally take charge. Rely on the combination of mass organizations. Focus on reversing verdicts and stirring up emotions. It must be linked to the great international traitors. Cultivate cadres. Leniency for those who can clear themselves. Provide a way out; strictly forbid corporal punishment in disguised forms. The Chairman says we should strike down bad people, but we should not have two kinds of prejudice, treating enemies as friends. Implement the dictatorship of the military.

The spirit of the Xiao Gewu Work Conference regarding the rectification work done by political commissarsaltogether six issues that must be handled conscientiously, with great weight, meticulousness, and a focus on the bigger problems. Be conscientious. Records must be kept on those being struggled against. Follow the directives one by one, based on the experience of the six factories and one school. Raise the level of understanding; if there are tendencies toward medical issues, prevent and correct them. The issue of production. Before reporting, the line must be clearly explained. Can we speak of the three major benefits? The main parts of the full text must be transmitted. Grasp the six key elements: cultural background, time, location, work situation, accumulation. Get a clear view of the location. There is great significance now in getting a clear view of the location; a divisional-level plan must be formulated. Partial understanding. Independent thinking. Leniency to those who confess, severity to those who resist.

[Source: IMG.6442_english.txt] April 30, 1969 ()

The regulations for official travel from the institute are now being strictly enforced and have been repeatedly declared. It is reported that the usage for (the main) several issues is to be taken as having no plan for me. It is often instructed, spoken about before every trip, spoken about frequently, that people do not listen, do not treat the regulations as serious material, and should not treat this as a child's game, looking for trouble themselves. [crossed out text] 1968.5 Ten Articles [crossed out text] For official travel, morning report meetings should be changed to concluding speakers. One must go through the concluding speaker. The work of morning reports should be reorganized by the morning meeting; one must not, ought not to, be earnest and direct. Do not speak of a single good person, be unwilling to reform a single bad person. One must be earnest, must refuse, must investigate and research. Differentiate treatment, implement policy. Some are stubbornly resisting, obstinately refusing to hand things over (stubbornly not handing over). They must be dragged out by force; dragged to the very end, unwilling to be wrong, resorting to sophistry. There are some. The landlord class and special agents, whose crimes are immense, must be distinguished. Differentiate them from peripheral organizations, separate them from traitors and renegades. Distinguish between enemies doing bad things and bad people doing bad things. Selling one's life is more than... Some are to be handled after a serious self-criticism. Every possible means must be used to get to the bottom of things. Some say that as long as it is said, it can also be brought to the case when the investigation begins. Therefore, one must be earnest in order to win. All those who are connected to the line and belong to outside counties or regions must have a written certification. This is to verify the investigation. Some items are certificationscertifying what, of what nature, materials of confessionnot touching upon the whole. One must hold to the Central Committee's model materials for my review, must review historical materials, must review the work on major historical issues. How to do it well, and know when to stop. Cadres must be inspected. The second and third in command must take hold of this work, grasp the time tightly, implement the policy work, and organize study wellthe experience of the Six Factories and One School. There are materials with experience; new situations are analyzed in a new order. It is being done well. , arrange investigation - write on behalf of - conduct conclusion investigation and finalize tone for writing. How to put it. The few, the broad revolutionary masses, should be written as the concluding words of a portion of the masses. The omnipotent class stratum. Seeing one, writing it, and then saying it exists. To be spoken of above, arranged, spoken of first, and after speaking, rectified.

[Source: IMG_6443_english.txt] May 2, 1969 (Day of the week blank)

Yesterday's telephone conference, in accordance with the spirit of the meeting... some things, the postman was talking nonsense, conscientiously study Vice Chairman Lin's speech, build up great momentum, the speech from the Party's 9th National Congress, Vice Chairman Lin's speech, whoever's report, conscientiously study the Party's new constitution from the 9th Congress, implement the spirit of the 9th Congress and deepen the class struggle, correct attitudes, heighten and sharpen awareness, win the hearts and minds of the people, study historical experience, summarize current work, identify problems, further disinfect through study, enliven thinking, implement. Do not let the lower-middle peasants take the lead in beheadings, grasp the three-in-one combination, creatively study and apply, firmly grasp implementation. The brigade headquarters must print it, must get it into the students' hands, for the small teams, no less than three hours, study at the edge of the fields, hold symposiums in the canteen, do a good job with plans, measures, methods, hold study planning meetings, do a good job with reporting back. Every class must compete to be the first, compete to be the most solid, must be combined with rectifying discipline, the two committees disagree, carry out the will of the masses, implement in the first and second squadrons, implement. The work of rooting out poison at Haijiajiang, the implementation situation with the Young Pioneers, do the work, a proposal letter, carry out productive labor, go all out to collect and seek out medicines, the school to seek out herbal medicines, prepare the three-in-one combination work, combat readiness, farm for the revolution, squeeze in the time, get a good handle on the nearby land, hold a meeting to study, through... get a good handle on the situation, on awareness, get a good handle, resolve, the existence of, ideological problems...

1968.5.12 The brigade committee held a re-election. For those 14 and older, each team re-elected members; 27 from the 2nd team and 49 in total. For the 3rd Zhongjing team, 32 in total; for the 80th Zhongjing team, above middle. The well is two zhang and seven chi deep, with an average of seven chi around the housing, a top diameter of three chi, and a bottom diameter of three chi. Quality and quantity are guaranteed, and the project is guaranteed to be on time.

1968.5.13 The chemical fertilizer group held a discussion and study session. Some workmates were not reported but discovered: Gao Zhiqing, Xue Rong, Gao Shuixiang, Gao Chunhe, Wang Jindao, Xue Jugui, Bai Yuantang, Qiao Jinzhu.

68.5.17 Some people reported issues. The work team used a cart to haul away all of the brigade's pry bars. They used up all the rope for digging the well. They used up all the windlass rope for digging the well. The watering was not done very often. They used the bricks from the base of the brigades south wall in the early-season fields. They took the work teams useless fodder cutters and cooking utensils. They ask for things and don't get them. They used a lot of the wood from the base of the brigades west wall.

[Source: IMG_6446_english.txt] May 13, 1969. Regarding Wang An'yi's historical problems. On the night of March 18th, it was revealed that he had been a political police officer for the traitors Jiang and Song. A member of the Kuomintang. After joining the Eighth Route Army, he was absent without leave from his unit for a full five years. His confession was very poor, and his attitude was extremely bad. A struggle session was held against Wang Guilan. During the Cultural Revolution, Qiao Guimei and Qiao Sanmei were cunning and sly, and they conspired together. Qiao Guimei stole a big-character poster from Xiang Hong. Her performance during the Great Cultural Revolution was poor. Her calligraphy and paintings were sealed. She publicly and privately tore open the seal of Baiyuntang. She compared Wang Minggao to... she sent her family heirloom, the Huanglun land deed, out of the house. Her home was searched and confiscated. With the approval of the national leadership... tying him with a rope and interrogating him was too much. During this period, Liang Guozhen would raise her fist and hit Liang Mingsan. This was more unreasonable than the counter-attacks of the landlords and rich peasants. A thousand miles of life. Gao Chunqing, Ma Lianrong, Wang Wendao, and Gao Hongxiang went up to the village's Xiao Yangnian. Gao Zhixiang, Xu Wenguang, and Xue Tangxing were shouting. The three of them came at once. The six of them were clamoring at the door. They came back together. After coming back, they went home. At Liang Mingsan's house, Liang Mingsan said, "Uncle Wang, you're back." He sat in our house for two hours and said nothing. He left without any clear intention. Using the grain plundered from the 1968 labor. He used his own experience to testify, responding to Chairman Mao's call to creatively study and apply the works of Chairman Mao.

May 18, 1969. First, from Team 12, Qiao Guohai, Qiao Guokuai, Gao Fenglan. From Team 2, Gao Biku, Bai Chengshi, Bai Chengxin. Students included Gao Wenjiang and Gao Xuehai. The evil poisonous weed Jing Han Ye Xian. Tang Nianying was caught pulling down an electric pole and put into a struggle session. In the evening, a meeting of activists was held. Lü Maozhen gave a confession for investigation. Security section: Jin Lianrong, Gao Huaxiang, Gao Zhihe, Bai Yuanxiang, Qiao Tingfang, Gao Guoku, Gao Guoqiang, Wu Longjin, Gao Chunqing. The aforementioned people went to Qiushan to investigate the situation.

[Source: IMG_6447_english.txt] Summary by the Deputy Section Chief, Squad of the Southern Military Region Logistics Department

8:00 PM, June 8, 1968 (day of the week omitted)

The Brigade held a full-complement meeting. Regarding the incident of the detachment pulling and throwing, Gao Zailian made a confession at the meeting. Others held a meeting at the quarters of the Mao Zedong Propaganda Team. Those who raised their hands to participate were Gao Zaiqu, Gao Shixiang, Bai Yuanxiang, Liang Mingzheng, Gao Dianxu, Gao Dianzhang, Gao Zhiliang, Shu Degui, and Gao Zailian. Gao Zhiliang said, I also told them to go and pull. Gao Zailian said, When we go, let's go investigate the case. Gao Dianxu and Gao Shixiang said that while investigating the case, they discovered that Zhao Yun and Fan Chaohou were each taking one sleeping pill every night. Gao Shixiang said, We found two tons of opium at Big Commander Hongs house in Yanshan. Director Gao said, Spray it away, burn it away. Gao Guiyuan said, Gao Dianxu is shielding him, we cannot accept this. Bai Yuanxiang said, Im going back. Liang Mingzheng said, You all go back then. Gao Zailian, Gao Dianxu, and Gao Shixiang said, We went to investigate the case in Daixiang as well. Gao Yanqing was stopped, and it was indeed he who stopped him. When we went to investigate the case, we found two tons of opium, and many of us saw it. When they got back to Daixiang, people were playing cards. Later we said, Lets go back too. They all went back to sleep. Lets go back too, Liang Mingzheng said. Gao, are you still going to Yanshan today? Gao Zailian said, The reason we went to Yanshan was that Shang Xiu had to go. Halfway to Yanshan, Gao Zailian said, Ill rest at home. Liang Mingzheng said, Lets just go to Yanshan and ask clearly. Theres a brother shielding Yanshan, lets go ask. Theres a landlord shielding Yanshan. Upon arriving in Yanshan, they investigated and said, Car 19. Xing Yumeis brother said, I follow the revolutionary line. During the Cultural Revolution, Im afraid of taking the wrong line. So they all came back together. Shu Degui said, We went on the evening of August 13th. Liang Mingzheng said, On the tenth day of the eighth lunar month, we went to Yanshan. Liang Mingzheng also said, We arrived in Yanshan on August 13th. After the meeting, we took Gao Dianqing to his home to stay.

[Source: IMG_6448_english.txt] May 19, 1969 (Day of the week)

Cui Mingyun said: The Homecoming Legion came twice. One time, the Homecoming Legion took Gao Zhiqing and Gao Zhiguang and hassled them up on the mountain. (The place was Shizi.) (Cui Mingyun said, Leniency for those who confess, severity for those who resist. 7:30 a.m., May 20, 1969 (Depending on how well they confess, and whether they show any sign of repentance)) Gao Fengchen said: I didn't behave well when I was on the side. My confession wasn't good. Gao Dianrui said: My confession wasn't good. I repaired trees for three years. Lu Xiqin said: What they called me was just playing dumb and acting crazy. Gao Dianrui said: My confession wasn't good. What kind of act was that to be called? Gao Dianhou said: From digging earth to cutting wheat, I couldn't keep up. Gao Dianqing and Cui Ming said: You people at the brigade just said the team leader was difficult to call on. Gao Fengchen said: At the meeting, I could see they were unconvinced in their hearts. I thought, if I don't speak up, it will stay unspoken! I'll push forward, because if no one takes it, I won't speak up! No matter if the issue is big or small, once I've spoken, I'm resolved. Bai Yuanxiang said: Don't give an inch at any step, show no mercy at any step, we must get to the bottom of this. Gao Qihe said: Take the initiative to turn around military discipline, Gao Fengqing and Guan Qizheng will be transferred. Cui Mingyun said: Dachen won't let the two of them speak, Cui Chengyun said: Find a chance to transfer them to a post with nothing to do. Cui Mingyun said: If he refuses to mend his ways after repeated instruction, then put him in a place with a lot of people. Cui Mingyun said: First they used digging to find Bai Pai, which meant Gao Zhiqing was there. They took Bai Yuanqing by the face, dragged him into the pigsty, and gave him to Bai Yuanqing again. After Gao Diansheng took what Gao Diantao wanted, his children wouldn't allow it. Now it has been given to someone else. He was brought up for no reason. (People who participated in the scoundrels' class were Cao Jianrong, Cui Mingwang, Sun Zhaoke, Bai Yuanke, Gao Yuchen, Gao Dianzhang, Sun Zhaoxiang, Fu Jishu, Sun Dianrui, Sun Zhaoliang.) Cao Jianrong said: When Gao Zhiqing and Guan Qizheng were in charge of reassigning housing, they just let people have what they wanted. One time, they held a class struggle meeting about his misbehavior and his family. Many people attended, including Cao Jianrong, Bai Yuanke, and Gao Dianrui. Another time, Cui Chengwang and Gao Diantao walked all the way to Wulipo and on their way back, they made Liang Wangwang the bao chief and Gao Dianrui the bao deputy.

[Source: IMG_6449_english.txt] March 20, 1969 (Day of the week:)

The brigade held a commune-wide development meeting.

Fu Fengshan from Ziyuren made a self-criticism. Gao Jianju and Gao Guorui were there. Liang Juzhen gave a report on grasping revolution and promoting production, and on launching a major effort for Production Team 1 to cover the wells.

A Party members' meeting was held to study the editorial. The Party's new chapter. Gao Zaihui brought up the issue of tree planting. Gao Tianming's political thinking is that he is afraid of hardship and fatigue. We spoke up actively. If our thinking is aligned, there is nothing that cannot be done well.

In February 1967, all the staff of the Gushan Town government office were driven to Shatuo City, where they seized the official seal in August and took over. On the 13th, they were besieged by the highway army, which took over most of it. Because there were landlords, rich peasants, revisionists, and counter-revolutionaries, the township head and deputy township head were replaced. Zha Fanying and Li Ming were investigated. The economic security procedures were unclear. After returning to Zha Fanying and Gushan military affairs, they all went back to Shatuo. Disbanded. Each governed their own affairs. The main investigation was in Gushan, concerning more than 20 li of land and cadres. Registration for confessions.

5.28.69. A notice was circulated for each team to study the documents. Team 1: 35 copies. Team 2: 40 copies. Xiapu: 7 copies.

[Source: IMG_6450_english.txt] June 6, 1969 (Monday)

Vegetable Planting-type Manual Labor Teams, of which there are: 8 teams, 143 people; 60 male, 83 female. 8 supplementary laborers. Household-run: 31 teams, 106 people; 52 male, 54 female. Separately-run: 9 teams, 65 people; 32 male, 33 female. 9 supplementary laborers. Of which: The Vegetable-type Third Team has full attendance and resolutely and earnestly accepts problems, establishing programs. Household-run: Vegetable-type Gao Hongqing engages in struggle; Yan Jie, new words, secondary calculation characters. Separately-run: Among these is the Fifth Team, which is able to maintain regular work, but attendance is not full; people drift to household-run teams and are called back to make up the numbers.

The Middle School run by the banner has a total of 67 students: 55 in Year 1, 7 in Year 2, 4 in Year 3, 5 in Year 4/5/6, and 7 in junior high. There are 11 people in two privately-run classes. Every day, men and women at the edge of the fields study the Ninth Party Congress documents, hold discussions, read and study, apply teachings, and criticize and repudiate the right.

Militia: One combat platoon of 16 people has been organized. Platoon Leaders: Gao Qingjiang, Lü Wenying. Activities: On Mondays and Fridays, they persist in studying and drilling. They drill two to three times each week and turn out for exercises one to two times per week. At the edge of the fields, they study militia leadership; only for the team, with a special 2-4 person propaganda team under Xiao Xiquan. 15 people. Three Elders Propaganda Group: 6 people. Drilling with the poor peasant militia.

Development: Party members, 1st time: 28 people; 2nd time: 2 people. Among them are 4 people with problems who are able to make statements: Qi Zaijin, Bai Yuanke, Bai Yuanjin.

[Source: IMG_6451_english.txt] - Production Situation: - Total attendance - 172 people - 73 women - Hoeing seedlings - 106 - Reaping grain - 9 - Applying autumn fertilizer - 8

Hoeing bean seedlings: 1.125 mu. Hyacinth beans: 15 mu. Adzuki beans, corn: 95.4. Dry fields: 20. Currently under construction: 3 projects. Gao Zhijiang, Yan Tai, Qiao Tingyi, Wang Andao, Qiao Zhankuai, Gao Chunqing, Gao Zhiji, Li Xueying, Wu Xuecai

June 7, 1969 Convened a meeting of all brigade accountants. Secretary Wang spoke on the struggle, criticism, and reform concerning financial and material resources. Task (48 people). Before the summer harvest, we must grasp living ideas, do a good job of replanting, and not miss the farming season. Those that are unsuitable should be replaced and used. For sanitation and grain, carry out the "three checks": check distribution and the amount of grain consumed.

[Source: IMG_6452_english.txt] June 7, 1969 (Day of the week)

A commune-wide general meeting was held to expose and criticize Wan Manchan. A mass meeting was held for discussion on June 11, 1969.

Gao Longzhang, who turned himself in and whose case has been concluded: To be treated with leniency. Bai Yuanjin, with general historical problems, whose case will be settled after reporting for approval: To be treated with leniency. Gao Guoku, with serious political and historical problems (to be spoken of): To be treated with leniency.

Gao Zhengchen, with general historical problems: To be treated with leniency. Bai Yuanke, who turned himself in and was subsequently reported by others, whose case will be settled after reporting for approval: To be treated with leniency. Gao Zhihe, with the most serious political and historical problems, whose case will be settled after reporting for approval (to be spoken of): To be treated with leniency. Mass discussion on June 12, 1969. Nie Jianyang, with serious historical problems, whose case will be settled after reporting for approval (to be spoken of): To be treated with leniency. Gao Zhiqing, with general historical problems, whose case will be settled after reporting for approval (to be spoken of): To be treated with leniency. Gao Jiurui, who turned himself in and was subsequently reported by others, whose case will be settled after reporting for approval (to be spoken of): To be treated with leniency. Qiao Tingman, with a history of holding a puppet government post, whose case will be settled after reporting for approval: To be treated with leniency. Wu Zhaojin, with serious political and historical problems, whose case will be settled after reporting for approval (to be spoken of): To be treated with leniency. Gao Zhaoke, with serious political and historical problems (to be spoken of): To be treated with leniency. Gao Shewen, with general political and historical problems (to be spoken of): Likes to report on others. Gao Wenhui: Likes to report on others. Gao Tongguang: " Likes to report on others.

[Source: IMG_6453_english.txt] June 23, 1969 (Day of the week)

Supply and Marketing Cooperative: Gao Zhibian, Liu Fugui, Gu Zhihai, Han Chengying Credit Cooperative: Xu Zhiruo, Hou Jianzhong, Sun Juhai Health Clinic: Wu Kezhen, Yang Jinshan, Zhao Wanli, Hou Bingke Grain Station: Gu Zhiyong, Chai Zuosheng Tax Office: Xu Renchun

June 24, 1969. In the assembly hall, we reviewed, critiqued, and revised the leadership team of the brigade's Party branch. Group Leader: Xie Mingqi. Deputy Group Leader: Gao Zhiqiang. Members: Shi Jishan, Gao Lianzhu. Daily briefing from the Supply and Marketing Cooperative in the afternoon, labor in the morning. We will try to have haircuts done outside. The matter of restoring operations will be dealt with later. Compensation will be calculated as work points for lost work time. For the Credit Cooperative, Grain Station, Tax Office, and Health Clinic, compensation will also be calculated as work points for lost work time, with an additional year-end distribution at a fair price. Cooperative medical care is 5 jiao per person, to be paid in full between July 1st and the end of September.

June 26, 1969. The commune convened a meeting of the poor and lower-middle peasant representatives. The meeting was for class review. The spirit of the review meeting was conveyed and implemented. Internally, there must be a designated person in charge to manage affairs and ensure continuity. Externally, calculations will be based on the household's economic situation. Vegetable plots will also be calculated based on the household's economy, with a designated person to ensure continuity and handle work point settlement. The brigade will follow the state's economic plan, and the population outside will be counted toward the labor supply. The principle for weddings is to be thrifty and not extravagant, avoiding competition in holding weddings and funerals. Members of the population outside can be heads of household, but not heads of collective households. If a child is born without a registered name, or is disabled, members of the population outside must also be counted. Those who are lax in collective labor must focus on agricultural work.

[Source: IMG_6454_english.txt] June 26, 1968 (Wednesday)

In the Baihu area, for the two villages of Xiaozhan and Meihou, the policy is that the children of Ye Laodongdu do not have to work. Regarding the children of landlords: if their family background is landlord but their personal class status is student, the population count should be based on the current population, whereas at the time of the Land Reform, the population from that period was recorded. For children who marry and elope at 16, if the father does not approve, it is the custom for any child born to be given his surname. After the members of the Five Guarantees households all left, their performance was good. Personal class status is student, child of a district landlord, verified. There are 7 types of children of landlords and rich peasants. After joining the ranks, if production relied on exploitation, the landlord's "cap" is not removed, the rich peasant's "cap" is not removed. The distinction between children of landlords and children of rich peasants is that in '67, according to the 40 categories, they were landlords and rich peasants. The 39th category issued by the state is capitalists and laborers. How can this be clarified? It issues certificates in the 16th month. The official response is "Fine, don't fuss over it." For the 20 categories, certificates are issued. The 20 categories are divided, and for landlords and rich peasants with serious historical problems, their personal class status must be filled out in detail. For item 43, fill in 44. Fill in 44. If there is a blood debt, the provincial bureau's form on this subject should be used, and the names are to be revised.

June 28, 1968. The production brigade has decided to distribute pigs. To military dependents' households: Qiao Zhengliang, Qiao Zhengfang, Sun Yuanying, Gao Yongke, Gao Shuqing, Gao Shuhai, Gao Qingzhen 100 jin per household. 7 households, 700 jin.

Gao Borui, Gao Hongde, Gao Qingheng, Gao Xirong, Gao Runhou, Gao Runcheng, Qiao Jingui, Qiao Jinbao, Qiao Dengyi, Qiao Denghe, Qiao Denggui, Bai Yonghui, Bai Yongxing, Bai Yuanku, Qiao Qingsheng, Qiao Wenqing 50 jin per household. 16 households, 800 jin.

Qiao Zhengyong, Qiao Zhengyi, Qiao Zhengyuan, Qiao Jinxing, Xie Mingfu, Jia Mingfu, Sun Chuangui, Gao Tingyu, Qiao Denglu, Qiao Zhanfu, Sun Chuangui, Sun Liqing, Qiao Zhengyuan, Qiao Jinyuan.

[Source: IMG_6455_english.txt] June 28, 1969 - July 27, Weekly Meeting (Day of the week)

The heads of 68 households were present: You Tingyi, Xie Mingzhang. The following were supplied with cured tobacco: Wu Zhaojin, Wu Zhaowen, Wu Zhaoliang, Wei Dezhen, Gao Haizhen, Shi Zhaoyong, Gao Zhaoqian, Nai Zhengyun, Gao Bomei, Gao Zhaoxiang, Nai Weichun, Gao Boming, Gao Xiangxian, Gao Zhaoyan, Gao Xiangsheng, Gao Zhengshou, Bo Yuanxue, Qiao Tingzhu, Gao Wenke, Gao Wenhui, Nie Xianming, Gao Zhaorong, Nie Shanrong, Gao Dengxiang, Gao Huchen, Gao Longjiang, Gao Tingzhu, Yan Taibo, Ji Hui, Bo Yongjia, Bo Yuanjin, Bai Yongzhi, Liang Mingyu, Wei Zhengzhen, Nie Juxiang, Gao Zhaofa, Gao Zhaoxian, Gao Dengzhu, Gao Tingchen, Gao Zhaoliang, Gao Dengcai, Gao Bosheng, Gao Dengliang, Gao Wenlu, Gao Xisheng, Gao Dengjin, Bai Yuanxiang, Bai Yuanxiang, Nai Zhengshan, Gao Qike, Gao Zhaoliang, Gao Tingyuan, Gao Zhaojin, Gao Tingcai, Liang Jucui, Wang Xingdao. Each household: 63 jin. Total for these households: 473 jin. Team 1: 3,132 jin. Team 2: 2,868 jin. Grand total:

The following are households that do not get coal: Nie Youshan, Gao Mingti, Gao Shihua, Sheng Deyang, Zhang Yuxiang, Gao Yingsheng, Chang, Gao Zhaoke, Gao Wenxiang, Gao Jijian.

Leadership Group, July 6, 1969. Brigade labor, Supply and Marketing Cooperative under Sui Xinshan, Medical care under Gao Yingjiu, Personnel under Xie Mingfu, Grain under Gao Tingzhu, Granary under Yan Tai. The Supply and Marketing Cooperatives land and fertilizer are not to be changed. The medical station is one room in the north classroom of the school. Personnel, tax collection, and the Supply and Marketing Cooperative are located together. The grain office is one room in the brigade courtyard. Two people may be seen per medical visit. Exchanging grain ration coupons must be recorded by the brigade. Malnutrition must be recorded by the doctor. One more person is needed for medical care. Guan Meiyong is in charge. Personnel matters require approval from Xie Mingfu, who is in charge of all dispatches.

[Source: IMG_6456_english.txt] July 7, 1968 (Day of the week:)

1965, Number of purchasing households: District 1, Jiang Zhengdang, Wu Xiankuan, 5,140 households; District 2, Bai Yuantang, Gao Xiangsheng, 7,274; District 3, Qiao Guanghe, Qiao Guangheng, 2,857; District 4, Qiao Rongsheng, Qiao Wenyong, 6,800. Total: 22,071 households.

1967: District 3, Qiao Guangheng, Wu Juping, 16,655 households; District 4, Bai Yonglu, Qiao Wenyong, 2,200. Total: 18,855 households.

1968: District 1, Jiang Zhengdang, Wu Xianjin, Qiao Zhenghe, 27,290 households; District 2, Qiao Guangxian, Qiao Guangheng, Wu Juping, 18,618. 45,908 households.

Grand total: 86,835 households.

[Source: IMG.6457_english.txt] (Excerpt) Diary Entry

Dairy products 28.80, gross profit 10.89, for a total of 39.69. Cash ratio 30.81. Annual debt to outside households 49.33. According to the financial report, one household is short 72. This year's tasks: workplace safety, individual accounts to contribute 1 jiao, public welfare fund 5 jiao per person. Duty group: Group Leader Yan Tai, Gao Zhiyuan, Gao Yuzhu, Gao Changjiang, Xie Mingfu.

January 30, 1968 (day of the week omitted)

How to develop sideline production, the production team's financial management issues, and prompt payment for product sales. Sideline production includes: raising pigs, chickens, ducks, and bees; milling rice and grinding flour; and brewing liquor. Approved funds of 200 yuan. Use winter labor for sideline production. The brigade will manage the accounting for the public mess hall. Appoint two people with work points to manage finances and accounting. Streamline the work-study school. Work on animal feed, plant more vegetables, and allocate grain; grain is for consumption. This year's production plan arrangements: production this year must meet high standards, fulfill quotas, and make greater contributions to the country. Land reclamation for the Fifth Team. For the Fifth Team's land reclamation, Team 1: Tai Yang Jinfat, Gao Yingxue, Gao Huwang, Liang Wu, Gao Yuzhu. Serve production, do a good job of storage and safekeeping, focus on base fertilizer, and strengthen responsibility. The financial and economic work must have a system. For long-term sideline production, develop pig farming and plant pasture grass. The sideline production plan should be integrated with economic cultivation and arranged as soon as possible. For live hogs, focus on fertilizer. Old problems exist. Do a good job of quality control, keep detailed accounts, and ensure that expenditures are reasonable. There must be leaders at every level in charge. Militia work: report on battle examples, inspect the base. Use Wang Chang's private plot for seedling cultivation. Plant the large apricot trees until they take root; the completed soil and water conservation work is worth seven work points per day. Manure should be managed as night soil; some small teams need to arrange this before the Spring Festival. Catching weasels on the ridge: one person, several people per day. Pig raising: each person raises a pig head, to be paid for with cash or fertilizer. Production will be compensated at a set price. The procedure for cadres to withdraw funds will be changed from on-the-spot requests to a planned system. In '68 and '69, workers on assignment, including cadres sent to the countryside, must write reports and letters of guarantee. Repairing the large cart wheels is worth 10 work points per day. Team members must adhere to the sick leave slip system: get approval first, then see the doctor and record it in the accounts. The amount of cash to be used, the number of laborers to be deployed, and requests for grain all need funds. We are currently short. Sesame oil is needed; prepare enough now for the New Year. This year, we have prepared cloth ration coupons, coal, and oil. Repairing the school grounds is very difficult; do it on Saturdays, day and night. Welfare repairs: fully cover all public medical expenses at 5 jiao per person; each person contributes 4 jiao. Buy machinery to reduce labor, such as a tractor.

Three *jin* of pork, shared with my wife. The pork bones were simmered into a soup. For lunch today, we had pork liver. My wife helped me slice it into slivers and stir-fried it with celery. She also boiled a few red dates with some goji berries, strained the liquid, and used some to soak the dish and added some to it. She said it was for me to eat. It was only after I was halfway through the meal that I realized it was meant for me. Feeling quite embarrassed, I mentioned it. She said it didn't matter whether I ate it or she ate it, it was all the same. If I ate it, it was as if it went into her stomach. What was the difference?

Qingdao Dagang Shipyard Work Log. The old ship hull needs to be inspected post-modification, which requires the Shengli main crane. Technical documents to be completed by October 11. Regarding the stevedoring company's loading and unloading situation: after 8:00, the head of the Motive Power Section is to contact the company's Motive Power Section to arrange for the company's chief engineer, along with three to four people from hull, crane, and electricalHe Tian and Wu Kaigui. There will be two people per shift for the handover. Regarding the steering gear workshop: after the briefing, once the production group has assigned personnel, brief the stevedoring company's team leader. The team leader is to brief the shift foreman. If there are fewer than four people, the work can be re-prioritized. If the night shift has no foreman, one can be brought over from another shift. The foreman must clearly explain the hull structure. Every shift must inspect the bow, the large transverse beam on the company side, the rear of the large transverse beam, the edge of the main pillar, and the edge of the plates. In the engine room, check that the handrails are securely fastened, the edges of the small inner engine, and the corners of the transverse beams in the small engine room and the main engine room, etc.

Situation Briefing: The general assembly at factory headquarters was held swiftly and was very timely. It conveyed two proclamations from the Central Committee, forcefully striking a blow against the class enemies, greatly boosting the morale of the proletarian revolutionaries, and utterly deflating the arrogance of the class enemies. The broad revolutionary masses all clapped their hands and cheered. We are determined, under the great red banner of Mao Zedong Thought and closely following Chairman Mao's great strategic plan, to launch a new high tide in the struggle against the enemy and carry the Great Proletarian Cultural Revolution through to the end. Four, it was proposed that going forward, we must grasp class struggle and never, ever forget class struggle. Grasp revolution, promote production, and seize the all-around victory of the Cultural Revolution. Criticize Liu, Deng, Tao, Wang, Guan, Wang, and Qi; criticize them deeply and thoroughly, until they are toppled and discredited. Five, in production, we must learn from the Daqing spirit, learn from the Dazhai spirit, summon our full energy, and strive for the upper reaches to build socialism with greater, faster, better, and more economical results. Six, we must creatively study and apply Chairman Mao's works, learn from the People's Liberation Army, vigorously promote the "Three-Eight" working style, and strengthen our sense of organization and discipline to overcome anarchism. Seven, we must strengthen our awareness of the enemy's situation, heighten our revolutionary vigilance, and strictly guard against sabotage by class enemies. Eight, we must strengthen the unity between the army and the people. The army loves the people, the people support the army; when the army and the people are united as one, who in the world can stand against them? Nine, we must strengthen revolutionary unity, enhance revolutionary discipline, and resolutely oppose bourgeois factionalism. Ten, we must strengthen the dictatorship of the proletariat and resolutely suppress the small handful of class enemies. Eleven, we must strengthen the leadership of the revolutionary committee, obey the leadership of the revolutionary committee, support the work of the revolutionary committee, and defend the authority of the revolutionary committee. Twelve, we must strengthen our studies; read every day, come hell or high water. Thirteen, we must strengthen the great revolutionary criticism; criticize the counter-revolutionary revisionist line of Liu, Deng, Tao, Wang, Guan, Wang, and Qi deeply and thoroughly, until they are toppled and discredited, and eradicate their pernicious influence. Fourteen, we must strengthen the work of purifying the class ranks; take the small handful of class enemies, renegades, secret agents, unrepentant capitalist-roaders, and the unreformed elements from the landlord, rich peasant, counter-revolutionary, bad element, and rightist categories, as well as active counter-revolutionaries, and place them all under dictatorship. Fifteen, we must strengthen revolutionary discipline and resolutely oppose anarchism.

First, many of the factory leaders were on sick leave, so in the end, it was only me, Old Fan, Old Ding, and Old Liu who went to the airport. After we finished the procedures, we waited in the departure lounge. It was an overcast and rainy day. After the dense fog lifted, the weather cleared up, accompanied by the sound of cannons from a civil air defense anti-aircraft drill and the roar of airplanes. What I saw in Beijing

Second, on the 26th, we took the express train No. 23 to Shenyang. It had two sleeper cars, four hard-seat cars, two dining cars, two baggage cars, and two mail cars. October 8, 1969

Third, we arrived in Shenyang. Due to the weather, on the evening of October 13, 1969, the train to Harbin was delayed by twenty minutes. The Shenyang station was very chaotic, with no order. We were in a hard-seat car, which was very crowded with people. We had to stand all the way to Harbin.

Fourth, when we got to Harbin, we asked for directions at Churin. We stayed at the Dacheng Hotel. The hotel was very helpful and even bought us revolutionary train tickets. After we finished our business, we went sightseeing in Harbin. We saw the Songhua River and took an Ikarus bus across it. We toured Sun Island in Harbin, ate canned food, and took an Ikarus bus back across the river. We made dinner and prepared for the return to Beijing. We took a hard-seat car to Beijing. We stood all the way to Beijing. We stood all the way to Beijing.

[Source: IMG_6467_english.txt] October 15, 1969 (Day of the week:)

The brigade held a criticism meeting to resolve the March problem, after a planning meeting was convened in February. In March, there was no spirit; plans were made in April and May, but a phenomenon of spiritual fatigue persisted. Announced 10.13.69.

After a meeting with Jun last night to study the issue, we concluded that in proposing work and promoting combat readiness, three "living" aspects exist. The ideological manifestations are: looking at achievements, talking about difficulties, and complaining that its all just formalism. The three old houses in Xibo are all leaking; when it rains, it leaks all the way through. The small pigsty, the draft cattle herd. Announced 10.15.69. Had a talk with Zhu Guihe, who just came back from seeing a doctor, but because Hao (?) went to the retail department and then to Shapo for a meeting, the matter was not handled.

The brigade wielded great power through guagua xiang (?), conscripting people for digging. One person had no objection. All who were sick did not go; those who were seriously ill did not go. Bu being sick was not a valid reason. Announced 10.18.69. Digging the medicinal dregs ditch, three lines... Digging the medicinal dregs ditch, three lines... Digging the medicinal dregs ditch, three lines...

[Source: IMG_6468_english.txt] October 18, 1969 (Day of the week left blank)

The commune held a meeting of all brigade directors.

Prepare the land on the 20th; manage household labor contributions. War preparation tasks, including the war preparation tunnels, must be completed before the 20th. Workers for the Sugengyu water diversion project are to be re-registered; three work points will be allocated for animal care, with Wang Xuanzhong specially assigned to co-sign. Regarding the workers assigned elsewhere, the saying is: the work is the same, so whoever gets more keeps it. (A background check on the militia, ages 18-22, is to be conducted). On October 28, 1968, the commune credit union held a meeting of all brigade accountants to convey provincial financial and accounting work policies, study financial skills, and require account-keeping twice a month. The value of cultivated land and work points has increased. Wang Xuanzhong said: Regarding the purchase of livestock carts, we must determine if it aligns with policy. It could be like calculating work points for raising sheep and cattle, or perhaps the cost of the carts could be paid off over two years. Let the masses discuss it. Opinions are not unified; we will proceed once there is clarity. For the Sugengyu water diversion project, work points should be higher: $\frac{3}{4}$ higher for work inside the tunnel and $\frac{2}{3}$ higher for work outside. For animal labor, donkey households will be compensated for feed. Work points for this year will be based on support provided. Rations will be distributed to workers according to their labor days: 80% corn, 20% beans. Mountain goods will be deducted at the rate for millet. Regarding grain and oil measurements, the levy on members' private plots will be based on the production team's average yield. The land has been harvested, and the numbers are ready for distribution. Collective distribution will be based on age and labor ability; light work for the less able-bodied. A few people will issue the tallies. There shouldn't be too many labor grades, and the base accounts must be strictly managed; only a few people should issue the tallies. October 28, 1969.

In the evening, the Revolutionary Committee set a plan: plowing is to be completed between November 1st and 7th, with a second round finished by the 8th. Team 1 has 10 mu, Team 2 has 28 mu. Team 1 will work on the threshing ground, Team 2 will harvest the fields.

[Source: IMG_6469_english.txt] November 2, 1969 (Sunday)

The Production Brigade held a Standing Committee meeting. It was a conscription meeting: to defend the motherland, defend the Party Central Committee, defend Chairman Mao's revolutionary line, and defend the nation of the 700 million people. Ages 18 to 22. The conscription team is made up of five people: the Secretary, the Company Commander, a public security officer, a physician, and someone from the Women's Federation. The veterans held a meeting starting at 6:00, which went on until 1:00 in the morning. The fishpond work was too brief; they started digging up old grievances. A meeting of the poor and lower-middle peasants was held to make recommendations. Based on the investigation, not enough people met the qualifications. They faked the work on the fishpond, ignoring their public duties day in and day out. Whether there was a task or not, work was assigned to the fishpond. They started bringing up old grievances again. I can't tell my wife about this. If I receive a letter, I must write back; no intermediaries can be used to pass messages. The great afforestation campaign will last three to five days, starting on the 3rd. Half a *mu* per person. The entire brigade's afforestation task is 200 *mu*. For the autumn plowing, we must push for deep plowing, and not a single *mu* of stubble field is to be left. The second tilling still hasn't been finished. Team 2 has not brought back their tree branches.

[Source: IMG_6470_english.txt] Evening of November 3, 1969 (Monday), 8:00 PM / 6466 / 298

The commune held a telephone conference for all the production brigades. Speech by Wang Yuanli; Refer to Chairman Wang's key directives on pages 57, 80, 104, 135, 186, 220, 257, and 303. The third battle of the great afforestation campaign. There are 14 brigades. Huangling and Jinjiapo have not taken action. The total number of people who went up today was 1,044, including 298 women. 646.6 mu of land were dug. At the meeting today, Wang Zhixiang took the lead, with thought at the forefront. Xiaying: 34 households / 193 people, 46/45 people. Xianglao: 85 people. Lu: 60/63. Xin: 72/30 people. Xia: 46/85. Xi: 34/61 people. Shang: 49/32 people. Huang: 33/40 people. Huang: 44/70. Wan: 44/75. Hu: 30/78. Ma: 59/80. Nanyuan is the most shameful, with only 4 people. Xinzhaibao, today the battle was swift. Xie Zhiqiang cooked the meals, 4 laborers on packaging. Some people in Huangling dug more than 30 paces, just digging a few pits. In the morning, each person dug 199 paces; in the afternoon, 179 paces. No distinction between men and women, old and young. 10 educated youth, 6 elderly people. They brought food for 3 days and participated in the great campaign. They started work early and finished late. Xie Zhiwen, He Hai, Ju Yuan, Wu Xinxing. In Shanglinggou, 71 people, old and young, all participated in the great campaign. The 21 students from Xipo were very slow in their planting. Xiao Tian from Shimenqian, who herds sheep, also participated. The poor performers are nervous and haven't moved. The lower levels worry about the upper levels. Marketism. Sideline businesses only have outflow, no inflow. A lot of land has been prepared. You should compare yourselves to the bad examples. Tomorrow, the private plots will be taken back, and dividends will be distributed early. The commune lets you do afforestation, but you take liberties. If your brigade supports this, then change. If you support it, then act. The higher-ups have their methods. Not starting early, quality is sometimes not strong, holes are dug too far apart, depth is shallow. Some people, old and young, are digging on the sly. Criticize them in your hearts, then drag them to the meeting ground for public criticism. Tomorrow, the municipality will provide supplementary saplings. One person from each brigade will go to Shutiaopo. That Li Zhongchao has five poles, each five chi long, just sitting at his house. The households sent them to the market town, lodged a complaint. Compete to be advanced, compete to be fast. Automation, mechanization. One school, planting two fen of land, each person vying for half. Apply 20 trees per mu, with 2 trees in the middle, the center one chi away. Dig the ground low. In the east, make sure the tall people from Duogaoye go too. The students from Leng, elementary school students, doctors, all go. Those who can go, go. Those who can't go, all go to plow and widen the land. Finish work at 5-6 in the afternoon. Widen the area for firewood. All of Xiaoying in Huangling went to the vegetable garden, dug up the vegetables, and sold them for three donkeys; this is a rumor. Finally, speaking seriously, take this pit-digging matter seriously.

[Left Margin] Recorded by Shun, Wang, Lao Tian, Jue, and Zhijiang on the front lines, November 1969.

[Source: IMG_6471_english.txt] October 6, 1969

A telephone conference was held by the commune (Secretary Zhang speaking). Three issues:

1. On autumn plowing, the Three Autumns tasks, and land preparation, the plowing work must be implemented in each small district. Da'gan and Shihezi have only turned in 140,000 jin. There is an insufficient understanding of preparing for war and preparing for famine. Our commune should be the key focus. We must concentrate our strength on getting the grain delivered to the storehouse. This is a matter of the two-line struggle. Signs of this have appeared in Shimen. Some are capable but lack drive, feeding grain to the pigs. This is all about getting more work points for more exchange. Some don't guarantee it; they get more production for more exchange but don't guarantee it. In the past, we talked about slacking off in September. Part of this will be resolved this winter and next spring. We have no storehouses, so we must prevent mildew and rot. We shouldn't slow down. Stick closely to what was said in yesterday's telephone conference about autumn plowing-05. Taihan needs to do the math. At the four-level cadre meeting in the brigade, Gengzhuang said that when the fields look good, our hands have won. In Shimen, there are still some of Liu Shaoqi's so-called good methods. Mamaling isn't preparing the land; they are indifferent. Danglingnan has been picking at it for 80 years, not building the main road but fiddling with the side paths. There are a few issues we need to discuss when we get to the commune. Look at their actions. Why are they always failing to prepare the land and failing to engage in fundamental agricultural construction? This is a serious problem. They are neither grasping revolution nor promoting production. They need to get their hands dirty in the labor; their two feet must be stained with 10% of the soil. Work hard and fast. Danglingjian, Danglingbei, dig out the bottom later. Every year they make a plan, and it becomes empty talk. Get it done, get it done quickly, and increase work efficiency. Eat a late dinner, plant the third round. We must urgently study this and urgently deal with the resistance.

[Source: IMG.6472_english.txt] Production Team Processing Labor Rates Draft, November 9, 1968 (Saturday) (Number of people for grain and flour processing)

The Brigade Party Committee has decided to switch to electric motors for grain processing, for milling rice and grinding flour back and forth. Accountant Gao Shigui and Gao Xuelai have set the regulations: for each unit of millet .003, corn .006, wheat .008, sorghum .006, rice bran .008, dried sweet potato .008, small beans .008, fodder chopping .004. For outside teams: milling millet .006, sorghum .006, corn .01, wheat .015, sorghum .01, rice bran .015, dried sweet potato .01, wheat .015.

November 12, 1968 summary: In the past year, there have been 66 criticism sessions, 8 sessions on petty theft, 18 on the "four types" of elements, 9 leveling sessions, 16 on "putting work points in command," and 15 "deep digging" sessions. There have been 132 various types of study sessions. Xixi Finance and Tax School teachers, 81 people, including Gao Zhijiang. Xixi Commune activists, 9 people: Qiao Xinhai, Gao Xinshou, Gao Xianlan, Gao Xueku, Bai Yongxiao, Bai Yongge, Qiao Tingyi. Students include Gao Wenjiang, Gao Xuezhu. Xixi Brigade activists, 10 people: Wu Guangzhen, Gao Xueku, Gao Guangyuan, Yan Tai, Wang Chang, Gao Xianxian, Wu Jinlong, Qiao Xinhai, Wu Guangliang, Qiao Xinshou.

November 14, 1968, competing for tobacco yield: Team 1, 48 jin; Team 2, 46 jin. Total: 95 jin. Per-unit yield 220 jin. Cultivating superior varieties: 75 jin. Base moisture: 15 jin. Team 1: 11.345 jin, Team 2: 10.655, Brigade: 2.000 jin.

[Source: IMG_6473_english.txt] November 26, 1969

The commune held a finance and accounting meeting for the production brigades at the [?] department for aquaculture. Work team member Cui was dispatched to introduce the experience-sharing study session. Tomorrow, we will go to Huangtang Commune to visit and learn from the advanced. Comrade Kui Shan reported on the current domestic and international situation and the state of the class struggle locally. The communes [?] production brigades have generally [?] chemical fertilizer. The leadership and relevant departments have supported fishery production, purchasing large amounts of chemical fertilizer. With cooperative medical care and this round of fishing boat maintenance, there have been certain changes in family assets. Women are loved for their work in production and have shouldered a vital part of it. She went down to the production site three times, and after that, things proceeded smoothly. The third time, she went to stay at [?] to observe the fish situation. She had given birth just a hundred days before, and a hurricane lamp damaged her baby's eyes, so she had to use her own money for the treatment. She learned a lot from her experiences and from being deceived. He did ideological work with his wife for the first time, mobilizing the women. He once again used his own bloody lessons to educate others. During the experience-sharing session, he spoke of the life of people by the boats who had no land and no way to survive. He learned to be persistent, to find a way to live. At the application meeting, there was studying and speaking. He spoke of how in '67, there was a fire, which caused a split and a disbandment. Under the influence of a bad leader, things went bad and rotted from within the Party. At the meeting, consolidation work was done. Some were women, who themselves were willing to do the [?] work. Through studying the "three articles," they learned from Bethune's spirit of utter devotion to others without any thought of self. They also learned from the Old Foolish Man that one cannot be half-hearted or indecisive in one's work. First, it is not about chasing money, yet it is the path to becoming the wealthiest. Once, he went to find the brigade's boat, asking for the Chairman's quotations and a portrait of the Chairman, ensuring the Party was preserved. Another time, when recruiting boat crew, some felt that the things they saw were very dirty. So I went to the production brigade. Some young people looked and sniffed around the stove. I had already gone to the boat once in the morning regarding this matter, then went again at noon, again in the afternoon, and again in the evening.

Male Female Party League Cadre Brigade Qiao Tingwen " " Gao Zhikui " Gao Zhijiang " Yang Jinhui " Gao Zhizuo " Militia Qiao Wenshun " Gao Zhixian " Poor and Lower-Middle Peasants Gao Dengliang " Gao Shesun " Gao Shehe " Gao Shecai " Armed Militia League Members Bai Yongping " Gao Wenyong " Bai Yonggui " Qiao Jucai " Qiao Huiyuan " Xie Shun " Si Xianzhu " Gao Jinchun " Gao Genlan " Qiao Huihai " Gao Hongxin " Bai Yongying " Qiao Yixin " Li Zhiying " Gao Tangku " Gao Wenke "

November 28, 1969 Agenda Items from the Brigade Party Branch Meeting

2. A letter was received from the credit department regarding the resolution of an outstanding issue: the matter of the loan taken out by Zhang Qidi, a middle peasant from Du'anbu, which has not served its purpose of facilitating his children's marriages. 3. Comrades have returned from the study and education class in Xikeng. It was announced that Beimen will hold study sessions every Monday, Wednesday, and Friday. 4. Regarding Zhang's investment in the Caomiaogou credit department, the loan funds are to be recovered for tuition. Beimen is to recover its issued loans to be used for tuition. 5. Wang Xiaoyou from the Shangdang Commune Credit Union has issued a notice regarding the amount of loan funds. The funds are to be used collectively. After the audit is complete, the loan funds must be accounted for. Gao Fuyi from Shimen, on behalf of Kaifu Nong, will convey this at a general meeting. A major campaign to improve ideological work will be launched, and all tasks must proceed smoothly.

[Source: IMG_6475_english.txt] November 28, 1969 (Friday)

Covered in sweat, the mood was very dispirited. 2. All the credit departments are like banners; Dou Hongfa and others returned private houses. Guo Shiying, a lower-middle peasant, was exempted from labor reform. After he resolved the land issue and eliminated his worries about making a living, his work style in his professional duties and in planning his work improved. 3. A comrade from the West Street Supply and Marketing Cooperatives vegetable garden spoke. This was the first time the topic of women's work was raised, suggesting we be given a discount. We have a meeting every other time, and its discussed every time. 4. Shi Yunming, director of the Caonan Credit Cooperative, spoke about my historical situation over the past few years, the confiscation of checks and receipts from the enemy, and the work of going door-to-door to collect on overdue (mistake) accounts. 5. Wang Fangxiang from the North Street Credit Cooperative spoke (everything this person, Wang Fangxiang, said at the meeting was a lie). 6. Zhai Jinlong from Xiawugou spoke. 7. A poor peasant from Shiyuanzi, Wu Shiyuan, gave an account of his work (this person is Wu Shiyuan). 8. Gao Fuyi, a substitute deputy sales agent from Shimen, spoke (this person is Gao Fuyi). 9. Liu Beigui gave the concluding summary for the meeting: vigorously promote the work of ideological revolutionization, learn from Hejiaban, and strive for fairness and excellence in all areas of our work.

[Source: IMG.6477_english.txt] February 4, 1970. Party Branch: 21 members. Present: 9. Absent: 2. After returning from the commune's meeting of all brigade revolutionary committees, a meeting was held for brigade cadres, Party and Youth League members, and activists. Gao Zhijiang and Qi Jinyi relayed the spirit of the commune's directives. The post-meeting discussion covered topics of maintaining vigilance, preparing for war, and safeguarding our work style. Before the Spring Festival, speculators Starting tonight, substitutions on duty shifts. Just listing the names: Wu Shu, Ge Hao, Zhao Shouxin. Militia: 4 jiaoYang Jincun, Gao Changjiang, Qi Guihai, Bai Yonghai. 5 jiaoYan Tai, Liang Jucai, Gao Tangku, Qi Yuanyuan. 6 jiaoGao Qixian, Qi Wenyong, Gao Jinchun, Wang Yu. 7 jiaoGao Zhijin, Qi Youhai, Yan Wenjiang, Wu Xiangong. 8 jiaoQi Jinyi, Bai Yonggui, Qi Zhiyong, Liang Juhai.

February 5, 1970. The brigade held a general meeting for all commune members. Attendance required: 156. Actually present: 143. Revolutionary Committee member Gao Zhijiang spoke about the spirit of the meeting on the two lines, Vice Chairman Lin's speech to advanced individuals, the situation at home and abroad, and the state of the world warthe situation of a third world war. On the 6th, the first day of the Lunar New Year, we ate two meals, one in the morning and one in the evening. In the evening, we ate white flour rice. It is believed that for the next twenty days, we will eat two meals a day. Discussion in the evening. On the 7th, the second day of the Lunar New Year, the entire labor force was divided into two shifts. One shift for hauling manure from the autumn, preparing to dig a dry well. The remaining labor force turned over the soil in the Chen fields.

December 22, 1969 (Sunday). The propaganda team assembled. The brigade secretary, director, company commander, and political instructor were present for a meeting to investigate issues and implement policies. Specialized tasks: food processing workshop, repairing machinery, delivering public hay, hauling fertilizer by cart. There are many workers everywhere. Private plots planted with wheat have all been leveled. Bai Yuanjun: women are not permitted to carry earth. No one is permitted to live on land designated for threshing grounds. Ying Sanxiang's wife, Gao Zhihe's wife, and Gao Tangku's wife are not permitted. Private plots are returned to the ownership of the small teams. Gao Shengchun receives half a day's work points for hauling utility poles. Land for the elderly is not to be farmed by the small team; they will harvest it themselves. Gao Zhijin is in charge of grasping the current work. Yan Tai is in charge of grasping production. To promote production and grasp revolution, study sessions will be held, with a monthly subsidy of 5 yuan. Militia Battalion, Miao Xiang. Evening of December 21, 1969. 1. Hauling sand from the lower level to the large warehouse. 2. To the supply and marketing cooperative: cartwrights and carpenters. Cartwrights assigned to the old Jiao team, carpenters to the old small team. 3. Digging foundations for war-preparedness projects. 24 people dispatched from Nanshatan for the fortification at Kupota. 4. Digging the foundation for the dry well and water tower. Team 1: 19 people, Team 2: 24 people, Team 3: 24 people. Work has begun. 5. Accumulating and delivering manure, including night soil. 6. Many people working on the land processing foundation, 80 people leveling the ground on the southern slope. 7. Small team cadres participating in cutting grass. 8. Drawing up the planting plan. 9. Planning water conservancy projects. 10. Each team preparing its budget for combat readiness. 11. Subsidies and wages for various personnel. 12. Workers for the Mahuangyu water diversion project.

[Source: IMG_6478_english.txt] February 24, 1970 (Tuesday) Overcast

Studying the editorial "Grasp Typical Examples Well" from the two central newspapers and one journal. Grasping typical examples well has universal significance for leading the masses and advancing our work. Methods of leadership and methods of work are dialectical materialism and historical materialism. Methods of leadership and methods of work mean closely linking with the masses, coming from the masses and going to the masses. Methods of leadership and methods of work mean integrating theory with practice. Methods of leadership and methods of work mean grasping the principal contradiction and grasping the central link.

[illegible]

[Source: IMG_6479_english.txt] Attended the production team's live meeting: from the fishpond team, Wu Jintang, Fan Banchang, Qiao Zhengwen, Gao Changjiang; from the old Danan team, sales agent Gao Yougong total of nine people. Gao Hongqun (problem). January 11, 1970, production team live meeting, attended by Gao Lianrong and Liang Mingji. Gao Lianchen, on August 13, liberated the Dingfeng team. On July 21, during the land measurement, he swore an oath to commune members Gao Xiangming, Gao Xiangji, Qiao Zhengzhu, and Zhang Yuzhong that if it was not taken back by the day after tomorrow, he would attack Gao Lianchen on the 20th and flee on the morning of the 21st. Gao Xiangzhu was the one measuring land on the 21st; he exposed Gao Lianchen as a specialist in exaggerating land by 8 mu. Wang Xueyuan's wheat was threshed to death by Gao Xiangqing on the night of July 21; the next day he went to the orchard. Gao Lianrong and Bai Yuanshun were there. On August 11, went to the grassland to hold a meeting, with Liang Mingji, Qiao Zhengzhu, Qiao Zhengshun, Bai Yuanding, Fu Xiangqing present. Wang Damen's son walked to the grassland and said they needed to dispatch the militia, with the intent of disrupting the fallow period for the yams. Zhou Tingyuan was there. At the meeting, it was said that for food and clothing, there were patches to be made. Zhou Tingdao was there. There was the forestry production team, able to get something out of it, not to be missed. Gao Xiangrong was told to go to Liangshan for grain. On August 10, went to Liangshan to prove that Gao Lianchen was the mastermind. The grain was not brought back. Upon returning, went to Liang Mingji's house. Qiao Zhengzhu is now living at Gao Lianrong's house. Joined the Party in '42, it was the Anti-Japanese Private Girls' Association, director Gao Youqing, organizer Gao Youguang. Reorganizing Lianrong, the law committee dispatched Liang Mingji. In '44, it was changed to the Anti-Japanese United Association, director Gao Youguang, fishpond Xiang was Jin, organizer Chaochen, medicine distributor Gao Youqing. In '46, it was changed to the Farmers' Association, director Gao Youguang, fishpond Bai Yuanjin, organizer Gao Lianchen. In '47, it was changed to the New Farmers' Association, director Gao Renke, fishpond organizer Qiao Tingshun. Investigating secretary, Quan, Du Lai, Bai Yuanding, Deputy Du Gao Xiangqing, Liang Shunyun, Qiao Zhengzhu.

October 29, 1969 (Wednesday). Using the machine rice huller and flour mill: consumed 120 jin of milled wheat, 70 jin of river-milled wheat, 170 jin of Tai-milled wheat, 130 jin of millet, 259 jin of sorghum, 136 jin of sorghum grains, 214 jin of sorghum and millet, 120 jin of mixed wheat, 84 jin of Xueming millet. Planting Plan, January 1, 1970. Team No., Millet, Corn, Sorghum, Yam, Broomcorn, Beans, Total. 1st Team: 413, 3575, 17, 1722, 30, 790.02. 2nd Team: 326, 3875, 10, 765, 30, 800.16. 741, 5985, 27, 1785, 61.74j. Adzuki beans 7000, soybeans 6500, grain beans 6000, sunflower seeds 4000.

[Source: IMG_6480_english.txt] (Deadline) Date: January 3, 1970 (Day:) Reports must be submitted to the commune promptly. For poor-quality land discussed in the production and livelihood directives, up to 10 jin may be submitted to the commune for every jin [harvested]; from now on, not a single jin will be accepted beyond what is covered. Report what you have. For next year's production, you may report 3-5 jin as needed. The commune will withhold a portion for use at the forestry center, and the production brigade will allocate some for afforestation. The public welfare fund will be withheld as needed; when the brigade has money from income, it will have funds for repairs, for the processing plant, and for wholesale purchases for the township to repair water conservancy projects. The final accounting reports are to be implemented as approved by the management committee; reporting even one extra jin is not permitted. If one jin is reported, or more is produced than the wheat, the final accounting report will be used until the end of December, at which point the oil and wheat ration coupons will become invalid. Purchase from the materials department yourself. After the year-end final accounting, each team will uniformly account for spoiled wheat. Report to the commune before the end of the month. The brigade will conclude its work before the first of January. On the 26th, a total population of 420 was reported, including a total of 90 children whose parents are workers away from home. First round of education recipients: 254 people. Second round of education recipients: 254 people. Propaganda team: 24 people. Study group for Jingzi, Anzi, Ganbuzi, Dangfazi, and Tianyuanren: 24 people. Award recipients: Qiao Xinhai, Yang Jinzou, Qiao Zhiquan, Qiao Xingen.

On 70.7.25, a general meeting was held. Teacher Gong Gui relayed the 106 articles of the constitution passed by the first session of the National People's Congress on September 20, 1954. On the 26th, militia company commander Qiao Zhijiang relayed the spirit of the seven-day county study meeting and formulated the work plan for the next phase. A meeting system was established: study sessions every evening from 8:30 to 10:30, with attendance taken before and after. A work schedule was established: start work at 6:30 in the morning, finish at 11:30 for the midday break; start again at 2:00 in the afternoon, finish at 7:00 in the evening. On the 27th, a general meeting of all commune members was held to relay and discuss these matters, with comrades Qiao Tingzhang and Bai Yuanjin speaking. On the 28th, a women's meeting was held with 42 attendees; 3 party members were absent. After review by the brigade party branch, 10 people went to the brigade for study.

[Source: IMG_6489_english.txt] On the 28th, there were 18 League members, of whom 3 were women, and 116 members of the masses, of whom 34 were women, for a total of 124.

On the 29th, a general meeting of all farm members was held to discuss the Constitution, particularly its great significance. They were divided into two groups for discussion: one was the masses group, and one was the Party and League members' group. The speakers included Wang Yingdao and Sun An, who spoke about the great significance of amending the Constitution. Previously, we generally went from a disorganized state to socialism, passing through many transitional periods, some of which were arduous. Now, we are developing further from socialism and transitioning toward communism, which requires unity and the amendment of the Constitution. The speakers in the members' group were very ordinary. They were all able to speak about amending the Constitution; the previous stage was the period of transitioning from mutual aid and cooperative societies to socialism, the harvest period of the People's Commune. Gu Yulai said that this year, after the fourth [Plenum], some things were done to the utmost, and some were revised. Now the Central Committee has issued a notice to mobilize the masses, which is a necessary and brilliant move to amend the Constitution.

The total number of participants in the discussion was 134, of whom 34 were women. The 7 Party and League members were divided into one group for discussion, the Party and League members' group.

[Source: IMG_6490_english.txt] Advanced Team: Zhang Qiang, Gao Youji, Gao Xianguang

August 23, 1970. A team-wide women's meeting was held to relay Central Committee documents and to study and discuss the 130 Central National People's Congress delegates named in the two central party newspapers. Vice-Director of Production Liu Shengping is in charge of this, along with Xi Zhua, Xu Zhengse, Zhang Feiliao, Guo Zhi, Heng Shui, Gao You, Liu Xingguo. Topics included banana leaves, cow manure, electricity, and the deputy station.

Of the 130 total delegates, 38 are women. Regarding the discussions, meetings for study and discussion are held every day at the brigade headquarters. We have held two evening sessions, relaying the information to all 130 comrades twice, with each person receiving a copy. In the end, a resolution was passed by everyone. 170 people participated in the discussion: 94 men and 76 women. The women's meeting will discuss this tomorrow evening.

[Source: IMG_6491_english.txt] In the last paragraph of the Charter, "people's democratic state" was (deleted) and replaced with "socialist state of the dictatorship of the proletariat." Article Four: The state-run system is to be eliminated, replaced by the principle of exploitation, by the remuneration received by workers, and by the foundation of the worker-peasant alliance. On August 3, 1970, at the Provincial Commune Members' Representative Conference, 80 representatives were present for the CCP Central Committee and the People's Congress, including 39 women, one rich peasant, and two from industry. On August 15, 1970, the school discussed the cases of Wang Mingfu, 20 years; Wang Yutang, life; Jing Guohua, life; Chen Gang, 15 years; Zhu Haiyi, 5 years; Bai Wen Yuan, 10 years; and Wu Peirong, 10 years a total of 7 people.

Hebei Province Xinhua Printing House, (Cotton Textile Mill), Capital Construction Bureau, Industry Bureau, Urban Construction Bureau, Chemical Industry Bureau, theater, power supply, for democratic use, one unit, two types for general use.

[Source: IMG_6493_english.txt] A meeting of the brigade's branch committee. On the night of August 27, 1970, conveying the spirit of the commune's four-level conference. Did the prefectural committee want us to talk about vitality or just report good news? It's about using Mao Zedong Thought to arm everyone's minds. For example, in afforestation, fish farming, and road construction. In our work, we shouldn't just be reporting good news. All of this is the proletarian world view, it **is** the proletarian world view. Proletarian action, if dominated by the wrong ideology, is mistaken; selling things off quietly is tantamount to undermining the conscious efforts of the people. Take, for example, the Nanshan Pig Farm selling pigs to render lard for storage this is yet another kind of thinking. A person's thinking is better than anything, but it has two sides: it can be a good thing, but it can also be mistaken and become a bad thing. The ephedra crop did poorly last year. We need to work desperately, but we also need to consider things. We attacked our tasks and our work, held criticism sessions at night, and went up to the central road during the day. We planted wheat and garlic, and the fields were clear, but we didn't state it clearly. During the busy season, we couldn't go work on the north ridge. After the wheat harvest, the matter was truly not closed; we didn't have enough experience, and our foundation wasn't deep. That's why we didn't get a good handle on reporting good news. One kind is the genuinely difficult kind, which is reporting good news. Another is reporting good news as a matter of procedure. When the time is right, we must get to the very root of reporting good news and see it through to the end. Vigorously grasp reporting good news, grasp the central work. A superficial assessment, all talk and no action, is a complete waste of breath.

[Source: IMG_6494_english.txt] Regarding the discussion of work opinions, what was proposed at Yun's yesterday was improper. Everyone must understand: the old leadership must correct it, as the new leadership will not be able to discover it. Therefore, what needs to be shut down must be shut down. Discuss the work, grasp the work, and hold application meetings. There are many differing opinions on the work. We must get a good handle on the leadership team, and think less about just focusing on reports. If you ask the higher-ups, a decision will be made immediately. Work opinions should be handled at different levels. Hold frequent meetings to get a good handle on things. Hold a beautification and coordination meeting once a month, focusing on primary responsibilities and experiences, and short publicity lessons. We must get a handle on the leadership team and hold frequent meetings. Purchase study materials on their behalf, have a plan, and hold application meetings. At the end of the month, the brigade will speak first, and the teams will follow. When it's time to use electricity, every trade and profession must speak. There will be a competition between publications and propagandists to see who speaks best. For the main team's work, review manuscripts. Advanced deeds should be reported, and backward ones must also be submitted. There are long pieces, as well as medium and short ones. Use forums, and there must be lively, daily results. Unearth and compile from experiences. The brigade must frequently report to the commune. Convene a meeting of teachers, requisition materials, and creatively study and apply Chairman Mao's works. The roving declamation team must be set up; we cannot allow a single blank spot to exist, nor can we allow it to be unmanaged and without anyone in charge. Get a good handle on the drafts, then supplement the factory committee, eliminate them, and bring them into the world. Since April, three cadre meetings have been held at the commune, township, and committee levels regarding work plans and the future situation. When party-related issues are discovered, including those involving collapse, report the bad ones to the commune; the component groups must also report and provide opinions to the commune.

Second, on contemporary policies and their practical application, the brigade must organize lectures. Third, get a good handle on the topography. At the beautification meeting, each household should report less. We must focus on holding topography study classes, comparing those run by households, courtyards, labor protection offices, and schools. For maritime education, teachers must also submit reports long pieces, as well as medium ones. Every household's daily results must be unearthed and compiled from experiences. The brigade's small group must act on the day of the lunar birth. The preparatory work for the revolutionary committee will be on the eighth day of the lunar month; a meeting must be held.

[Source: IMG_6495_english.txt] The brigade held a leadership meeting. On the night of September 15th, a speech by County Party Secretary Gao was relayed. In '66, while digging wells, the small teams were disbanded. In '67, they made a mess of forestry again. Every household contributed large, thick trees. Listen to the Chairman's words. Through self-reliance in '67, various scientific and technological methods yielded 800 jin. In '68, 1,500. In '69, 2,000. In '70, well, in '70 it's now 1,200 jin. Afforestation is not working, good land should be cultivated for agriculture. Close off the mountains to nurture the forests. There are quite a few livestock farms surrounded by trees. The brigade must accept asking for handouts from higher-ups. Trying new iron tree varieties. The black jujubes have been harvested. Walnuts. The big jujubes are ready, which should solve the labor issue. The land for willow saplings is not lying fallow. We must press on with fallow land cultivation. Thresh the millet. Turn over the grain tax. Set up small-scale processing. Everyone earns money. A bad autumn harvest is no good.

Li Huaying, Director of the Brigade Revolutionary Committee's Women's Federation, said that Tian Liyun and Liu Chui are good models for holding high the works of Chairman Mao. My own study has been extremely poor. From now on, I must use shorthand.

Poor peasant Wang Andao: On application. My study is not strong. My application is not working. The small team has no tasks for me, so I'm very much at ease. The courtyard is my responsibility.

Through study, Zhang Laiyun spoke: I will listen to commands. I care about the labor. I will do a good job on the threshing ground and be there whenever I am called.

Poor peasant Ma Lianying: In terms of study, the study sessions are not strong. I will focus on labor. I will cherish public funds and property. I don't sell my calligraphy. If there are questions and answers, I will be there. I walk the main road at night. I dig the water cisterns early. Shame is like family.

Zhang Baohang's support is huge.

[Source: IMG_6496_english.txt] 0.9. At 3 PM, the brigade held a leadership meeting. Zhang Youwei and Gao Zhiquan spoke on application. In '66, digging wells wiped out the production teams. In '67, there was a call for afforestation. Every household had large, thick trees. Listen to the Chairman's words. Self-reliance. A 300-yuan allocation from the Bureau of Agriculture and Forestry was sent back. This winter, 800 jin of new tree branches were planted; 1,500 in '68; 2,000 in '69. The annual output was 700,000 jin, now it's 1,200 jin. Planting trees and creating forests it won't do to use good land; the guiding principle is to plant trees. Cultivate forests on all mountains. Make considerable use of state-owned agricultural and pastoral farms. The brigade must build. Mobilize the higher-ups to lend a hand and allocate tree seeds. Go a thousand li. Walnuts and jujubes can all bear fruit. No land, whether yin or yang, will be left barren. Autumn plowing must be grasped firmly. Thresh the millet. Deliver the grain tax. Set up small-scale soybean oil processing. Everyone earns money. Last autumn was not good. Li Huaying, director of the Brigade Revolutionary Committee's Women's Federation, spoke: in women's work, we must closely follow Chairman Mao's works and study them well. Our studies have been very poor. From now on, we must integrate theory with practice. Wang Anzhi from the armed forces department spoke on application, with unwavering resolve. The production teams that apply it well, the production team political commissar appointed, like a soldier, the militia appointed. Passed with determination. The Zhang and Li medical cooperative's report: Listen to command. Care for the laborers. Go to the threshing ground for injections whenever called. She Lianying from the commune's development department: In studying Chairman Mao, she is resolute in going to work, without fail. Actively protects public property. Carries out practical tasks. Responds with enthusiasm. Vigorously follows the great path. Builds ponds early. Treats the commune like her own family. Her family's earnings and expenses are very large.

[Source: IMG_6497_english.txt] The youth, Gao Lian-zhu, is a good soldier, works hard, takes good care of things, and follows orders. I worry that when it comes to the real work, he might not be able to do everything well. Ive only been feeding the livestock for five years, and this year the livestock aren't doing well. Some are hard to feed, some are easy. It would be best if we could guarantee our partners get selected.

From learning and mastering the skills, from what I've come to understand, our plan is to meet often and seize the season. From plowing and sowing to the critical moment of harvest, we must grasp every opportunity tightly. The work is just immense, one task right after another. The wheat needs to be protected from disease as it grows. From the autumn harvest onward, it never stops. Theres nothing more to say; we must learn with an open mind and follow the lead of others to get the work done, not just do it our own way.

After the meeting, we'll hold another one to address any problems and bring our suggestions to the production brigade.

[Source: IMG_6498_english.txt] October 18, 1970

The production brigade held a general meeting of all its members to mobilize everyone for the major task of land improvement and to study the Second Communiqué of the Second Plenary Session of the Ninth Central Committee.

[Source: IMG_6501_english.txt] Notice is hereby given that the Three Cadres Meeting will be held on the 26th. The directives from the central, provincial, and municipal meetings will be conveyed, and the great agricultural harvest will be discussed. The meeting will last for 4 days. Attendees will be commune directors and brigade directors. Each commune may also select one or two production team representatives. Representatives from the lower-middle peasant core, student representatives, and school teacher representatives are all acceptable. The commune is allotted 35 yuan. There are 4 commune and brigade units: the supply and marketing cooperative, the purchasing and sales store, sales agents from the station, the repair and assembly factory, the repair and assembly station, and repairmen from commune and brigade units. Points of attention: this year's great harvest, next year's plan, and representatives for this year's planning. Accommodation will be at the guest house. One accountant from the commune will go to manage living arrangements. Representatives will be drawn from the labor force. A telephone notice was sent on the 1st. Notices were also sent on the 11th, 18th, 21st, and 23rd, but as of now, they have not attended. The number of people is 150. The work on cotton has not been handled with sufficient urgency. Vegetable planting is lagging behind. The "four implementations" have not been met; explain the reasons. For Jilin, pursue the base figures for topdressing fertilizer. Post-autumn management: cutting grass, raising pigs, soil processing. The "three guarantees" for people and land, and reserve fields. 20 people. Sows, one household raises one pig, three to four sheep. Water conservancy work: 1. Cultivation and planting. 2. Cross-pollination and hybridization. 3. Establish a fine-breed seed farm next year. 4. Wide-row mass planting. Brigades will draw people for fertilization. 5. Today, the 27th, brigade and team leaders are to go to the Dragon King Temple to observe the mass application of base fertilizer, 20,014.

[Source: IMG_6502_english.txt] 10. 8. 26 Morning: The Provincial Drought Relief Headquarters held a conference call. Yesterday there was a meeting in Chaoshan; today we are mobilizing the entire province for a highway overhaul, and we must do a good job of combat readiness work. Transportation must be made smooth to facilitate passage for both the military and civilians. Shapo is a battle slope; the front line must be well-maintained. Raise vigilance to defend the motherland. Universities, middle schools, and primary schools are all starting classes and work. We have three major highways to repair. Within the province, on the Wanyi-Shushan road, it must be made fast, like a garden path. Some roads have uneven pits and ponds that must be repaired and filled. Where there is no water, the three-kilometer road will be built to the side of Xuetong Bridge. A general mobilization: everyone must work within their means to improve every highway. For a road one meter or two meters wide, there is a brigade. The roads through the brigades fields are often impassable; every household lacks road access. Carry out deep maintenance on the highways and do a good job with the drainage ditches on both sides. Trees by the roadside cannot be cut down indiscriminately. Repair the highways well, and the road maintenance workers will keep them level. They are essentially combat engineers. On the Wanyi-Langshan highway, there are three kilometers that need repair. On the Wanyi-Yanhai road, there are three kilometers to repair, where there are restaurants and vegetable gardens; they will be responsible for repairs in the future. There need to be slogan placards for pursuits, one placard per li. The repairs must be good and sanitary. Repair the streets. Some must focus on repairing the concrete and doing freelance maintenance to clean up the territory within their jurisdiction. We must speed up and get this done well. The time is short, the task is great, the ideas must be comprehensive, and the actions and measures must be good. The highways are a reflection of the lower-middle peasants.

[Source: IMG_6506_english.txt] Evening of August 4, 1970

At the middle peasants' meeting this afternoon, Wang Guofeng mentioned that the hillside repair team sells 2,000 jin of grain in the afternoon. Bai Yongzhi mentioned that things aren't balanced now because there are more people, big and small. Children around ten years old don't have private plots, and they can't not have work points for their grain rations, as a child in their teens eats quite a bit.

Bin Rongliang mentioned that we need to use our brains to overcome old habits, because by the current standards, some households have their grain production leveled down, while others don't. A husband's production should be used to level up the household that doesn't have its production leveled.

Mei Heyuan said that some households borrowed last year, borrowed this year, and will have to borrow again next year, borrowing more each year than the last. In three years' time, they'll have done nothing but eat up all their rations.

Wang Wenzhi mentioned that when commune members' households are self-sufficient, we should give to whoever needs it. When reporting production, it should be averaged out per person, not managed and distributed the old way. If a household has difficulties, we should look at their production value, not just their output.

Party members meeting, notable names not present: Gao Zhuanghe, Bai Yuantang, Liang Riqiang, Wang Chang

Gao Haiwang, one straw hat. Qi Yuanfu, one jin of insecticide. Xing Xian turned in 1.20 for rush seeds.

June 6, 1970

The brigade organized a field management specialty team: Qi Yulan, Old Mrs. Gao, Gao Minglin, Gao Mingru, Gao Xinu, Gao Xiku, Gao Haizhen, Gao Haimei, Qi Lianyong, Qi Guimei

From Gao Longjiang, Gao Zhixian, Gao Zhirong, Guo Jianrong, Gao Shengguan, Gao Jiansuo, Gao Tangfu, Gao Tangchun, Gao Shengchun, Gao Yonglu.

June 7, 1970

The brigade organized a pest extermination specialty team. Team 1 has Gao Zhixian, overseeing Wu Xianliang, Qi Lianyong, Gao Haizhen, and Gao Xinu of Team 1. Team 2 has Bai Yongzhi, Ma Liangui, and Gao Zhirong.

Party Dues and Struggle Sessions, June 16, 1970

On the 16th, I came back from the production team and we held a branch committee meeting without even taking off our field clothes, to convey the spirit of the team's internal meetings. It rained, so the general meeting was not held. On the evening of the 17th, we held a Party peace meeting, discussing the main tenets of the Party constitution and the 50-character guiding principle. We were divided into two groups: Qiao Liandi's group and Gao Zhirong's group, with each person speaking. We only studied articles 8-10. Four activists were selected for consideration: Li Huaying, Gao Zhuangshun, Gao Zhirong, Gao Xueliang, and Shi Zhengshan. On the 18th, we solicited opinions for the platoon. Apart from Li Huaying, who studied well, there was a seven-person group to compare with: Qiao Tingyi, Gao Zhijin, Gao Zhijiang, Li Huaying, Shi Zhengshan. In the evening, the demobilized and transferred soldiers attended a party: Gao Zhijiang, Gao Tingjiang, Qiao Zhiheng. On the 20th, the struggle session was held as planned. Afterwards, there was a discussion forum. During the discussion, Gao Tingzhu said that a Communist Party member cannot be greedy for wealth or profit. Don't take advantage of others. If you take advantage, someone else will suffer a loss. If you do things to get things, you must also be prepared to lose things. Where there is an advantage, there is a disadvantage. Where there is a gain, there is a loss. As a Party member, one must not be greedy for what one is not entitled to. From now on, the black flag must be a year-round constant. On the 21st, a criticism session was held. All commune members participated in a mass criticism session at the brigade headquarters.

[Source: IMG_6508_english.txt] Socialist society is a considerably long historical stage, and throughout this historical stage of socialism, class and class struggle continue to exist.

Party members should therefore hold high the red flag and be at the forefront of the masses in the struggle against prisoners, class enemies, and capitalist roaders within the Party. They must not be "Mr. Tail-draggers," but must serve the people wholeheartedly. It is as Wang Chang often said: A Party member's thought must be pure; in whatever they do, they must first consider the series of proposals on relief grain and oil, and not just refuse them. Gao Xueliang said: Since the Cultural Revolution, I have not fulfilled my role as a Party member. I have subjectively erred by taking from the collective and must resolutely carry on the revolution. On July 20, 1970, upon returning from the finance department, it was relayed that the afternoon meeting in Jinan had been cancelled. That evening, on the 20th, the Revolutionary Committee convened to convey the spirit of the finance and trade business meeting. The attendees were Qiao Tingyi, Gao Yuanjin, Gao Dedong, Gao Yuanxian, Yang Jinhu, Yan Tai, and Wu Xianliang, seven people in total. The meeting was changed to a discussion due to rain. On the 21st, a general meeting of all commune members was held to convey the spirit of the finance and accounting meeting and to study the new Party Constitution. On the 24th, the Revolutionary Committee met to study its work, and on that same day, a general meeting of all commune members was held.

[Source: IMG_6509_english.txt] Quotations from Chairman Mao, The Spirit of the Proletariat û The Jiulong Doctrine Chairman Mao Instructs: A heavenly revelation, thus among the sages. The future of our country is a consolidationist state of the dictatorship of the proletariat, based on the worker-peasant alliance, led by the working class (through the Chinese Communist Party). "The working class must lead everything." To make the great proletarian leader Chairman Mao's thought and the founders of the workers' republic deservedly see Vice Chairman Lin (China's Zhou Enlai, etc.) as the "core strength" is the core strength of the subversionist state, and to make the core strength of the state, is to reach the armed forces, finally saying "Vice Chairman Lin is the Commander-in-Chief."

[Source: IMG_6511_english.txt] The Culture Party Branch convened a study session for Party and League members. A total of 3 people attended: 15 Party members and 8 League members. The study article was "Grasp Revolution, Promote Production, with Class Struggle as the Guiding Principle." The first part was about correcting various non-proletarian ideas within the Party. The second part was about building the Party branch into a strong fighting fortress. After the study, everyone participated in a discussion. The consensus was that the study session was well-organized, with both specific and general remarks. Everyone felt they had benefited from the study, and that without studying, one could not oppose what is bad. This increased the broad branch on the evening of 70.10.15

A few times a month, the women of the small group just need to go to Zhejiang to collect their wages. They must apply to the production brigade in advance. New-style cotton: two bundles, three stacks. Cash cotton, thick-wadded cotton: three stacks. The first category lives in the commune hall.

[Source: IMG_6514_english.txt] Jiang Yuan, Cao Jiu, Shui Fu, Gu Zhi, Jian Yun, Bo Yi, Yue Xiangye, Yuan Boyuan, Cheng Ying, Mao Qiu, Ding Cong, Zhu Rong, Xiao Shan, Ding Lai, Cheng Su, 20 Ye, Shi Shi, Wang Tai, Ma Ying, Yue He, Wu Lin, Chen Ha, Xin Hai, Shi Men, Cheng Li, Lu Yuan, Zhang Ting, Lu Quan, Liu Xian, Huang Qin

On 7.1.13, our three divisions held a meeting of battalion commanders from all major and minor detachments. In accordance with the spirit of directives from higher command and after analyzing the current situation, it was concluded that our unit should actively and proactively coordinate with allied units in combat, striking the enemy from the flank. On 7.4, it was resolved, based on directives from higher command, to annihilate the enemy while on the move. In light of the current situation, and because our unit's manpower and weaponry have been replenished, it was decided that our unit will develop its operations eastward. The primary shortcoming during the operation was the poor secrecy of our movements; communications, reconnaissance, and announcements all failed to ensure combat readiness. 195. After discussion, it was determined that the previous order could not be completed due to the flawed deployment of a fierce, head-on assault. One base of ammunition for the machine gunners was depleted at once, and three rounds for the mortars. Machine gunners must conserve ammunition. Tomorrow, upon reaching the destination, we are to rest and reorganize. In the afternoon, we will arrive at Balizhuang to make camp. In the evening, a large force will be dispatched to Xima. The order to attack on the 18th will be issued at Xinyuan on the morning of the 8th, with the river crossing possible in the afternoon.

[Source: IMG_6515_english.txt] 7. Before sowing soybeans, soak the seeds for 10 minutes in a 700-fold dilution of 70% mancozeb wettable powder, or treat them with 40% quintozene at a rate of 0.3-0.5% of the seed weight. Where available, seeds can be treated with a rhizobium inoculant. To do this, moisten 100 kg of seeds with water, then evenly sprinkle the rhizobium inoculant over the seeds, mixing as you go. After mixing thoroughly, air-dry the seeds in the shade and sow immediately. 8. At the initial onset of disease, spray with a 1000-fold dilution of 50% carbendazim wettable powder, an 800-fold dilution of 50% thiophanate-methyl wettable powder, a 500-fold dilution of 70% mancozeb wettable powder, or a 1:1:200 Bordeaux mixture. Spray once every 7-10 days, for a total of 2-3 applications. 9. For red spider mite infestations, spray with a 1000-fold dilution of 20% dicofol emulsifiable concentrate, a 1500-fold dilution of 40% dimethoate emulsifiable concentrate, or a 2000-fold dilution of 50% phoxim emulsifiable concentrate. 10. For aphid infestations, spray with a 2000-3000-fold dilution of 50% pirimicarb wettable powder, a 1500-fold dilution of 80% dichlorvos emulsifiable concentrate, or a 1500-2000-fold dilution of 40% dimethoate emulsifiable concentrate. 11. For cotton bollworm infestations, spray with a 1000-fold dilution of 90% trichlorfon crystalline solid or a 2000-3000-fold dilution of 2.5% deltamethrin emulsifiable concentrate. 12. For soybean pod borer infestations, during the peak period of adult emergence, spray with a 1000-fold dilution of 90% trichlorfon crystalline solid, a 1000-fold dilution of 50% phoxim emulsifiable concentrate, or a 500-fold dilution of 25% cartap aqueous solution. 13. For lima bean pod borer infestations, during the flowering and podding stages, spray with a 1000-fold dilution of 90% trichlorfon crystalline solid or a 3000-fold dilution of 2.5% deltamethrin emulsifiable concentrate. 14. For cutworm infestations, drench the roots with a 1000-fold dilution of 90% trichlorfon crystalline solid or a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 15. For mole cricket infestations, mix 50% phoxim emulsifiable concentrate with wheat bran, soybean cake, or other materials to create poison bait to lure and kill them. 16. For grub infestations, drench the roots with a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 17. For wireworm infestations, drench the roots with a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 18. For root maggot infestations, drench the roots with a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 19. For weevil infestations, spray with a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 20. For leaf beetle infestations, spray with a 1000-fold dilution of 90% trichlorfon crystalline solid or a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 21. For looper infestations, spray with a 1000-fold dilution of 90% trichlorfon crystalline solid or a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 22. For soybean stem fly infestations, spray with a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 23. For bean weevil infestations, fumigate in storage areas with aluminum phosphide. 24. For leafhopper infestations, spray with a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 25. For thrips infestations, spray with a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 26. For mirid bug infestations, spray with a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 27. For leafminer fly infestations, spray with a 1000-fold dilution of 40% dimethoate emulsifiable concentrate. 28. For snail infestations, apply 6% metaldehyde granules. 29. For rodent infestations, use poison bait with 0.025% coumatetralyl or 0.005% bromadiolone to lure and kill them. 30. For weed infestations, spray with 48% trifluralin emulsifiable concentrate before sowing or after sowing but before seedling emergence. 31. For dodder infestations, spray with 48% trifluralin emulsifiable concentrate before sowing or after sowing but before seedling emergence. 32. For general weed infestations, spray with 48% trifluralin emul-

sifiable concentrate before sowing or after sowing but before seedling emergence. 33. For diseases, spray with a 1000-fold dilution of 50% carbendazim wettable powder or an 800-fold dilution of 50% thiophanate-methyl wettable powder. 34. For insect pests, spray with a 1000-fold dilution of 90% trichlorfon crystalline solid or a 1000-fold dilution of 50% phoxim emulsifiable concentrate. 35. For physiological disorders, improve field management, apply more organic fertilizer, irrigate properly, and carry out timely tilling, weeding, and pest and disease control. 36. For nutrient deficiencies, apply targeted fertilizer based on the specific situation. 37. If lodging occurs, promptly set the plants upright and hill up the soil around them. 38. In case of premature senescence, promptly apply top-dressing fertilizer and water. 39. In case of excessive vegetative growth, control nitrogen fertilizer and apply more phosphorus and potassium fertilizers. 40. If flower and pod drop occurs, promptly water and apply top-dressing fertilizer. 41. If empty pods occur, promptly water and apply top-dressing fertilizer. 42. If shriveled grains occur, promptly water and apply top-dressing fertilizer. 43. If pod splitting occurs, harvest promptly. 44. If mold or rot occurs, promptly air-dry the harvest. 45. If sprouting occurs, promptly air-dry the harvest. 46. If there is insect damage, promptly air-dry the harvest. 47. If there is rodent damage, promptly air-dry the harvest. 48. If there is bird damage, promptly air-dry the harvest. 49. In case of frost damage, promptly cover the plants. 50. In case of drought, promptly water. 51. In case of waterlogging, promptly drain the field. 52. In case of wind damage, promptly set the plants upright. 53. In case of hail damage, promptly set the plants upright. 54. In case of phytotoxicity, promptly water. 55. In case of fertilizer burn, promptly water. 56. In case of salt damage, promptly water. 57. In case of alkali damage, promptly water. 58. In case of soil acidification, promptly water. 99. In case of soil compaction, promptly water. 100. In case of soil infertility, promptly water.

[Source: IMG_6516_english.txt] One matter takes precedence: to carry out tasks aside from combat missions, such as identifying units that employ cunning and deception. Due to the strain of the march, there has been insufficient rest, leading to physical exhaustion among the officers and men. Compounding this, because of the situation, cadres have been lost, and with a lack of new recruits, the number of combatants has decreased and combat effectiveness has weakened. The residents have mostly fled across the river. Our unit has 38 households, 207 people, and 320 horses (this was telegraphed). There are 600 catties of baggage over 30 catties each, 6,000 large livestock, 2 logistics vehicles, and 6 personnel from the 0 Division depot, originally belonging to the military region. Those from the 16th and above are all with their respective units. Among the broad ranks of engineers, there is anti-American sentiment and war-weariness. In total, 70 officers and men, some intending to go home, plan to send money to their families and then desert. On one occasion, had there been no leadership or command, they would have joined together to flee. The approach seems to be to wait until they reach a station. It is estimated that each man will be issued four hundred every three months issued upon enlistment and issued during combat. They are preparing for a three-month deployment. They speak of methods of protest, methods of asserting their own will. They are preparing for three months, to send money home and then desert. On one occasion, had there been no leadership or command, they would have joined together to flee. The approach seems to be to wait until they reach a station. It is estimated that each man will be issued four hundred every three months issued upon enlistment and issued during combat. They are preparing for a three-month deployment. [Source: IMG_6517_english.txt] Last year, when we saw them start pounding the earth for the wall, they were pulling by hand. Later, we came up with a new method and managed to build a copy of an old-style pulling machine, which saved a lot of labor. While we were making the machine, some people said, The devils can probe the heavens and the earth, but they cant find me.

Interview with Director Tian Ge: There are a total of 3,280 women, and the presidium and womens chair have been eliminated. Some people say that those who are given things speak plainly, while those who arent speak in a roundabout way. Theres a lot of this to-and-fro. Some things were given, yes, from the grain branch, 700 in total. The women participated in labor, earning an additional 24,300 work points. They made over 400 pairs of cotton-padded shoes for the frontline stretcher teams and washed and scrubbed over 130 quilts.

At seventeen, I could make a living, I was literate, and I wanted to sign up for political and ideological education. I could build machines myself, bake steamed buns, and handle livestock breeding and stud bulls. I could plan out wheat fields and large farmlands, turn dry fields into paddy fields, and improve the manure scoop for collection. The autumn harvest and winter cotton yields were high. For the womens medical team of the guerrilla forces, I gave haircuts, washed and mended clothes, and boiled water, providing whatever conveniences I could. To think our ideals were so grand.

[Source: IMG.6518_english.txt] Yesterday at the commune there was a first meeting. It was about the brigade Party branch and the upcoming major rectification campaign to raise consciousness and bring order to our work. Before, it was a total mess. From now on, everyone should bring everything out into the open. The principle: one "can," four "don'ts." Pay attention to Chairman Mao's words and to the two newspapers and one journal. Even the old men will get it and participate actively. Don't let problems last overnight. The more we do, the more energy we'll have; the more we do, the more enthusiastic we'll be. The more we do, the more it is just unity, unity, unity with the leadership! The style is the Three Great Revolutions: scientific experiment, class struggle, and the struggle for production.

Following the great call of our great leader Chairman Mao, we are required to learn from the experience of the advanced brigades. We have few small busy seasons, but many big ones. From now on, we will go all out on water and soil conservation and learn from the poor and lower-middle peasants. We were bringing water up the mountain; they are bringing water up the slope. We fell behind. The resolution of the Tu brigade Party branch was to go all out on farmland water conservancy. After Huatian improved its irrigation and soil quality, its yield increased from six or seven hundred catties to two thousand catties. The situation for us east of the river, under the Party's leadership, last spring. Consciousness. The mass Party branch meeting, the Dahuangzhuang meeting. Under the leadership of Chairman Mao, this time it is an ideological class struggle. Scientific experiment, the three great class revolutions. On the foundation of Mao Zedong Thought, under the leadership of Chairman Mao, the Chairman's works. Under the call of Chairman Mao, through studying, listening, and observing, we will continue to raise our consciousness and build up the revolutionary cause, fighting for the science of agriculture and learning from the old poor and lower-middle peasants. Their own sons and daughters were gloriously sacrificed, yet they shed no tears, but were instead happy, worked hard, were not sad, did not cry, were not submerged

[Source: IMG_6519_english.txt] At its core is the red heart of the proletarian revolution. It is said that everything XXXXXX said and did was done well, with great determination and tireless energy, in loyal service. This is a meeting for the changing of the guard. From the factory committee and the deputy director to Master Gao, it is said that the old masters are not needed on the same scale; they have only the roles of one, to supervise; two, to pass on knowledge; one, to take records; one, to advise; one, to remind; and one, to learn.

A simple meal without waste is how we treat guests with courtesy, in hopes of a good reputation rooted in broad criticism. Friendship first, friendship forever. A work style that fears neither hardship nor death, shedding blood and sweat, without the slightest dread. Here, we hold our organizational life meetings and begin our sessions, countering the arrogance of the American imperialists and Soviet revisionists. Tonight, we study documents and editorials. Tomorrow, we visit the new recruits' company to be educated.

[Source: IMG_6520_english.txt] High Heaven and the Old Marshal Faction in Beijing, the detention letter for the four comrades-in-arms from Jinan, the forcing of the door the result was an even greater homelessness. After he went back, our brigade assigned more brigade work. The intensification of the line struggle is always for the honest ones; Big Sister said that talented people are hard to come by and get no reward from the brigade, and that those who split hairs over every little thing are utterly useless, just scoundrels with their own private knowledge and opinions. As for Mei, she was sick and stayed put obediently, which also allowed the root of her illness to be thoroughly investigated.

The road is to the west of the commune, under the jurisdiction of the brigades Party branch, so nothing can be done about it.

The brick and tile factory owes the brigade about 200,000. Its said that with over 100 jin of rice, plus the extra expenses for the commune and brigades production, things will open up around the New Year. Things are very tight at the commune, but this year money is a bit looser and there are prospects.

[Source: IMG_6521_english.txt] Li 28/10/89

The UN General Assembly resolution on sanctions. Whether or not it can ultimately be passed in the UN Security Council will be seen in the next day or two. Among the 66 sponsoring countries, can a two-thirds majority be gathered? It is estimated that it can. At that time, there will be a vote, and the peace talks will survive. In order to gain support, Meng is not just superficially acting like a lone figure in South America (by casting an affirmative vote at the General Assembly) and adopting a follow-the-crowd strategy (a diplomatic formality). He is specifically targeting a common grievance (referring to the discrimination against Black people). The Ministry of Welfare does not register students at the start of the school year. Some people say: with few people and a lot of land, life is good. Conclusion: The white racist regime in South Africa is already facing unprecedented international isolation. Before this, they were traitors. They are preparing to develop the economy in an attempt to save themselves. They are striving for at least 20 million tons! Contradictions and pressure. Beset by difficulties both at home and abroad, their situation is also becoming increasingly difficult.

Summary of the Central Working Conference. Everyone is concerned. The biggest international events that everyone is concerned about. Issues: The issue of US-Soviet relations. The issue of Sino-US relations. The issue of KMT-CCP relations. There may be breakthroughs in all of them.

[Source: IMG_6522_english.txt] Section. There are a total of 67 friendly nations. There are many aspects. First, it has fought more than 60 wars and provoked local conflicts. Second, in the political sphere: it carries out subversive activities against socialist countries; it interferes with, subverts, and controls many countries in Asia, Africa, and Latin America. Third, regarding national liberation movements, from the first to the twenty-fourth time. Why is the United States always defeated? It cannot continue fighting in Vietnam. Domestically, in the United States, there have been more than twenty instances; ethnic minorities, mostly Black people, are in America. There are contradictions between China and the US, between the Soviets and Europe, and between France and the US; then, amidst this hostility, all factions must be consolidated. The people demonstrate daily. American imperialism is in difficulty; what is to be done? The problems of one, two, three, four, five, and six refer to the situations described above. Raise vigilance and defend the motherland. Strengthen combat readiness; this is the experience of several decades. The discussion requires us to prepare to resist aggression. We must heighten our vigilance to defend the motherland, defend the Party Central Committee, and defend the world revolution. To save the world revolution, to save the oppressed peoples of oppressed nations, and the proletariat we are called members of a socialist country, and this is the responsibility we ought to fulfill for the world revolution.

[Source: IMG_6523_english.txt] Drive them to ruin, bring about their swift collapse. We must be well-prepared, take active measures, increase our efforts, and ease world tensions. Educate the broad masses of youth to awaken profoundly, strengthen misunderstanding, and wage a resolute ideological struggle against them. A struggle over which of the two paths to choose, strike them to the ground, and step on them with a foot. Their bodies stink. A bloody struggle, do not allow them a single move. (Summary of the Seven Centers) Arrived in Pujiang on the 20th. Spoke about (1) the day's rectification situation (2) "Life." Watched the three o'clock and four o'clock speeches. Raise class revolutionary sentiment, class consciousness, class perspective, class line, class perspective. Then break into small groups for discussion, selected article readings. Cadres and branches have thought for years, all have a lofty revolutionary ambition. Their hearts are pure, their character is good, their work style is good, their spirit is good. In every word and deed, in thought and style, when people are of one heart, they can move Mount Tai. The momentum is tremendous. Views on VOC. Discuss experiences, discuss realizations. It is enlightening, it is a jewel, it is a model. Raise consciousness, class sentiment, the foundation. Consolidate the dictatorship of the proletariat, the foundation and the dictatorship of the proletariat.

T-T-

[Source: IMG_6525_english.txt] The throat is a call & a dagger-axe head, felling is going to the fields, presenting a hand for labor to see the skill, which side is ahead, this other person is in the front area, later on, the hand hurts in the back room of the thatched hut, its when sitting with the guests of big-bellied business that the pain on both sides hurts, hands and feet in a flurry, how many disasters have passed on the great road that cannot be resolved, look, shaking the head while walking the navels mainstream wets first, clear, walking step by step with urgency, the back aches afterward, guest, talk and education, the heart understands, hating that there is no face for what comes after, this and this is the great banner of -ism, advance forward, must embrace all of Yis production and replace it all, friend start the body submit to pain and bravely advance. The withered yellow and greatly damaged sea is used to look at that invasive seedling machine, using 302 clear Yi invasive seeding, grain & seed of the great manors iron color, planting mountains and rivers, using the clear color of the onset of disease, applying base fertilizer, using the remove-yellow big fertilizer, to hand the old foundation over to the soil, the person who turns yellow.

[Source: IMG_6526_english.txt] The class ranks are divided into leaders and laggards. When going down to the fields, the early laborers act as foremen, leading the way at the front, one row ahead of the others. But they put class struggle and the two-line struggle behind them, building their thatched huts without any sense of direction. They waver on the great road of revolution, looking this way and that, flustered and disorganized. As they walk this great road, they can't even pay attention to where they are going. Like walking on the edge of a terraced field, their feet slip into mud pits; every step is blind and without direction.

Through study and political education, their hearts become clear and their eyes bright, and their direction becomes true. They advance toward the great socialist orientation, casting aside bourgeois ideology and mobilizing the masses to surge bravely forward.

Second, one must put learning into practice. For managing the brigade's forestry, practical application means ensuring strong seedlings during spring planting. Soak the seeds in 302 Chlordimeform. For millet, plant the "Big Iron" variety. When planting yams, use ammonium bicarbonate and apply a base fertilizer. First, apply a fertilizer of local manure and ash, place the seeds on the soil, and then cover them with the manured soil.

[Source: IMG.6527_english.txt] Studying and discussing Comrade Chen Bingde's speech, and the issues we have been talking about, belong to two different categories. Carrying out the "Four Cleanups" Movement is a matter of the struggle between two roads: the socialist road and the capitalist road. The rice transplanter is a tool of production, a matter of production technology; it is part of the struggle for production.

This afternoon, in discussing Comrade Chen Bingde's opinions, with all our various ideas, we must clarify whether the seed is to take the capitalist road or the socialist road. Carrying out the "Four Cleanups" Movement is a matter of the struggle between two roads: the socialist road and the capitalist road. Promoting the rice transplanter is about developing production, about engaging in production; it is part of the struggle for production. Promoting the rice transplanter is a revolution in production technology. As Secretary Zhong has said, when we carry out a technological revolution, we are also carrying out a socialist revolutiontwo revolutions. We know it's an obstacle, yet we insist on promoting it. This production responsibility system and the promotion of the rice transplanter are in conflict. It's not the first time, nor is it that we don't know. We are fully aware there is resistance, and without a thorough revolution, it cannot be solved. We must deeply and thoroughly break with the old things, old ideas, old work styles, and old customs and forces. To manage production, we must first manage class struggle. Once you grasp class struggle, everything works. For the commune branch, we still need two other sets of measures. In the long run, we must develop sideline production to replace the private economy. The general direction is still to exceed production quotas. We cannot say that just because there are difficulties, we should retreat. Retreat is not an option; it is a dead end. We must worry less about what's behind us and look forward more.

The Hepo Brigade is only so big, and it has a lot of sandy beaches. We are an electrical machinery factory; we can't get it going because our technical skills aren't up to par. In the future, we will have to set up a management committee.

[Source: IMG_6528_english.txt] Enhance consciousness and overcome mindlessness.

2. Discipline must be strict. Discipline is the weapon for carrying out the political line and guaranteeing victory. Without discipline, an army cannot win battles. Raise revolutionary vigilance; enhance discipline and strengthen organization in thought, action, and life.
3. Be both red and expert. One must master technology, primarily for the sake of the revolution and to better serve the people. To be both red and expert, one must have lofty ideals and a revolutionary commitment to the cause, study diligently, and master technology through the integration of theory and practice to solve key problems in production.
4. Act immediately and decisively. This is the conduct befitting a revolutionary. We must oppose procrastination and irresponsibility.
5. Be hardworking and live simply, be diligent and thrifty. We must cultivate a style of hard work and plain living, and oppose extravagance and waste.
6. Be modest and prudent; guard against arrogance and rashness. One must have a correct attitude toward oneself, toward the masses, and toward achievements and mistakes.
7. Care for the masses, unite, and help one another. We must be concerned with the lives and hardships of the masses, foster unity, and learn from and help each other.
8. Practice criticism and self-criticism. This is one of the three great work styles of our Party. We must regularly practice criticism and self-criticism to correct shortcomings and errors for the benefit of the revolutionary cause.
9. Integrate theory with practice. This is another of our Party's fine work styles. We must combine theory with practice and oppose subjectivism.
10. Maintain close ties with the masses. This is our Party's fundamental line. We must regularly go deep among the masses, listen to their opinions, be concerned with their hardships, and serve the people wholeheartedly.

[Source: IMG_6529_english.txt] If I were to take up the matter, it would be as follows. This meeting did not go very well; it was somber, and the group leaders comments lacked enthusiasm. There was a great deal of political study, while operational matters were hardly discussed. They are trying to run production based on the idea of spirit transforming into matter, but when asked for concrete methods to run production, they cannot explain clearly. Those who came for introductory training should return to their production posts and make a comparison, using the ten standards to check their work. Then, if they speak from their experience on the production line, it will be more convincing. To strengthen this meeting, I propose the following points: The elderly, their past may not be experience. How should we treat them? The class line, how do we use the class line as the guiding principle to lead them and do a good job in production? The line the position. Look at production, investigate production, inspect them. The leadership should only lead the core members and go run their own experimental plots. Whether the above is appropriate, whether it should be used for reference, is a separate matter.

[Source: IMG.6530_english.txt] Shatuo Brigade convened meetings of the Party branch, the Women's Federation, and the poor and lower-middle peasant representatives.

They discussed our brigades development of the Dazhai experience by promoting roadside rice transplanting to save a great deal of labor, allowing for more to eat and better housing. They would make silage to vigorously raise pigs. They would expand the schoolhouse. They would establish a cement yard to develop sideline industries. The supply and marketing cooperative would greatly expand its fruit production, with three types of cakes for supply and sale. They would buy electric lights and quarry stone; every family would have stone, every household would have stone. They would build a public road to connect with all directions. They would set up power generation with diesel engines for electromechanical processing, for the benefit of the nation.

Bai Yunbi, Gao Yuan, Qi Yunhou, Wu Yunguang, Gao Qingyuan, Gao Yuanzhi, Gao Qingjun, Yi Yun, Jiu Yunbi, Bai Pingzhi, Liang Seping, Gao Yuanzhi, Gao Heji, Gao Lianping, Liang Xiuzhen, Gao Xiangping, and Bai Yongqin dug a dry-land well. They planted trees to create a forest. They added vigor to vigor. The barren mountains and wild ridges of the past have now gained some renown, a distant renown, shortening the distance. It is now a sea of green, with more than can be eaten: tall rapeseed, Bai Yunbi, Wang Lianjin, Liang Yuzhen, Gao Yunyuan, Wu Mingyuan. Bai Yunxiang, Wu Lianying, Bai Yunjin, Gao Yunqing, Gao Xiangmin, Bai Yunquan. In the days to come, the land will be bustling. They will organize grand plans for the agricultural district, for animal husbandry, for river maintenance, and for good machinery.

[Source: IMG.6536_english.txt] Regarding the spirit of the telephone conference: autumn harvest materials (wheat), chemical fertilizer, oil-producing crops, more output with less labor, Wangjiang County, materials from our own land, green operations, produce more forage and fodder, use land to cultivate materials, do not allow for human consumption, do not allow for horse carts, clarify the livestock feed situation. A supplementary loan of 10,000 *mo* will be provided after the autumn harvest, and will be fully deducted and repaid. Our materials will be put into storage. This is the basis of our livelihood.

Basic Farmland Construction

Mobilize effectively, concentrate the labor force, and use it according to the plan. Study the land, grasp the broader significance, and pick up the pace. Integrate this work with production: accumulating fertilizer, autumn plowing, threshing, and preparing fields during the autumn dry season. There are benefits to this; where there is land, there is drive. Some areas have not yet started. The Luyuan section's third work unit has begun preparing the fields. After the repairs, once it warms up, we will begin threshing, plowing the land, planting trees for afforestation, and cultivating 3-5 *mu* of seedlings. We must strengthen technical research and development. Launch a "minor autumn harvest" for wild plants. Target 600,000 *jin* of *diancao* grass (70,000), 4,000 *jin* of locally-sourced materials, and 80,000 *jin* of chemical fertilizer.

71.12.7. When commune members come, there are no fixed quotas or numbers. The style of work must be good; it is essential to earnestly improve our work style and establish the mindset of serving the poor and lower-middle peasants. We must be diligent and frugal, practice thrift in making revolution, and oppose waste. Therefore, it must be strictly enforced: no smoking or drinking; meals should be simple. Fertilizer should primarily be human manure. Manure and waste cannot be left over the winter, and manure piles should not be too large. Private plots are for growing vegetables, and the fertilizer invested in them must be kept within the designated index. Vegetable cultivation should be on private plots. Pig feed must be handled well. Seeds must be well-selected: no disease, no pests, no bad seeds, and no weed seeds. We must seize the time and seize the season. Manually clear diseased weeds to prevent future infection and spread. Staff and workers should only work half a day each day and should not compete for work with the poor and lower-middle peasants. They should be given half-day work points according to the type of work and should not be awarded the highest point value. In fertilizing, the work point values for strong laborers and for the old and weak must be differentiated, with variations for fertilizer application. We will not engage in disguised forms of work-for-shares, nor should this be how things are handled. Levies must be paid. For those who do not hand over money and grain, only sweet potatoes and potatoes will be distributed. For those with overdue payments, deductions must be made; there should be no accommodation or indulgence. Handing over grain but not money is also not permitted and should be taken as income. We must seek fairness to achieve a balance. This will allow production to develop more effectively. With enthusiasm mobilized, we must strengthen leadership and fight side-by-side to win the battle to turn production around. If one's ideology, work style, and labor discipline are all good, and ones performance in social work is solid, full attendance work points will be given. If there is backwardness, they will not be evaluated for full points but given half. For those who are worse, and who do not pay their levies, their membership in the commune will be canceled.

[Source: IMG_6542_english.txt] Lin Credit Shop's public provisions record: 17-950 jin. (To be distributed after signature). Per the Township Office dispatch, fertilizer is to be allocated for sale in this district by kilogram. Distribution will be proportional. For the cattle farmers, it is said that none have returned their information to the Farmers' Association for processing. Those with allocations of 30 kilograms or less will not be issued any; they will be accommodated with what remains. If there is still a remainder, it will go toward fertilizer. Due to some farmers' certificates being in Zhongli City, and others still having missing documents, there have been work delays and demands for labor. Some have voluntarily had their land allocation handled at the Township Office and will not wait for the general distribution to be completed. However, the multi-party allocation is 71.12.7 yuan. For the larger and additional allocation portions, a three-person group was formed, with Deputy Director Xiang Qingguang, Accountant Gao Deguang, and Yin Xiufang attending. Also present were Accountant Gao Jian, Representative Gao Tianhai, and Representative Gao Rongliang. Accountant Gao Deguang and Representative Gao Tiancai's portions for December have already been claimed. There were no remaining vouchers: 70 from the previous year and 7 from April of year 48. Total: 17.37.71.12.7 yuan.

[Source: IMG_6547_english.txt] Evening of 18 December 1971

The Jihua Commune held a three-level cadre meeting. Attendees: Zhu Jiang, Zhu Long, Xi Ting, Zhu Zhi, Guo Tai, Xi Ji, Xi Kuai, Zhang Huaishun, Wang Xingdao, and Zhang Xuemin. The cook was Yu Huangjin. Each person was provided with 4 jiao, which included firewood. For each day, every person received a work-point substitute of one and a half jin of wheat and five jin of coarse grain, along with a subsidy of one jiao in cash and half a jin of food rations. Team One's handcart was used to haul manure. Team Three delivered firewood to the commune and had its cart requisitioned. For the investigation and assessment meeting held by the commune, the subsidy was 2 jiao in cash and half a jin of food rations. For the cadre meeting held by the commune, the cash and food ration subsidies were to be determined separately. The purpose of the meetings was to resolve issues from the Struggle-Criticism-Transformation campaign and with the cooking staff. A Party members' meeting was held to resolve issues concerning Party members.

December 20, 1971. Credit Officer Meeting and Year-End Distribution Meeting. To further improve our work in supporting agriculture and to realize agricultural mechanization, with an average of one walking tractor for every two production brigades for pumping water for irrigation, we are preparing to purchase machinery. Some are requesting to buy large ones, while others want to develop sideline businesses. A medium-sized walking tractor costs 17,000 yuan; a 20-horsepower small tractor costs 13,000. For the year, income and expenditures are roughly balanced, with a small surplus. Of the five households with commune loans, all have been repaid. Some are still economizing; some are preparing to start sideline businesses. After discussion, it was determined that some are not very motivated, and some have poor credit. A 200 yuan loan from the Shimen Credit Cooperative has still not been repaid to this day. The private cooperative has little share capital, and some members are illiterate. If funds are not used properly by those with motivation, then in the future when money is needed, many of our households can take out credit loans. By the 27th, the accounts and ledgers should be put in order. Matters of due dates, transfers, and collections should be handled, the year-end settlement finalized, stamped, and concluded.

[Source: IMG_6549_english.txt] Evening of December 20, 1971

Discussing meticulous-style painting

The brigades Gao Liangliang announced that the Party members discussion on the fertilizer issue had drafted three proposals, but it was not being handled quickly. It just so happens that for the manure carriers, the children are being investigated for supplementary valuation, while for the adults, a valuation is being done. One option is for an adult to get a value of 6 points per unit of work. The second is to ask Chu and Mei and all the other adults; Ruitai also carried 14 loads, and it is proposed that this be considered for re-evaluation. Ma Yuzhi, who was partial to the corn, has a total of 18 entries, each estimated at thirty jin, for a total of five hundred and forty jin. Yu Shutang led a major work team with two units of labor. In total, 20 work points for land repair. Qi Yulian mentioned reporting extra cloth ration coupons; her daughter said she didnt say anything. Bai Yongzhi proposed not setting fixed work points for land repair if theres a shift, you work it. Shan Juzhens work points should be re-evaluated based on her rank. For the three work units, each of the children gets one unit, and each of the adults gets one unit. Ruitais 14 loads should be re-evaluated, with three work units for the children and one for each adult.

Back from the commune meeting, evening of December 20, 1971

The brigade convened a Party committee meeting to study two documents and resolve several matters. Next to the Third Peoples Counter-Revolutionary, there are a few households whose fertilizer has been handled unreasonably. They have muddled thinking, always feeling that they cant make up the difference, so they should be divided into three categories. This past summer, some people turned in soybeans erratically; there should be a supplementary collection for the spring, summer, and late-season crops. Adjustments should be clarified. Some have had their accounts re-evaluated, while for others, a portion of their land issue should be resolved. Jiang Youmei gathered firewood from 18 households in a neighboring team, and none of it has been settled. This needs to be valued and investigated daily. Some units are not making up for the autumn collection, while others are. Please conduct a re-evaluation for cash now. A daily supplement of two jiao. Some are getting the autumn supplement, some are not. Some were notified to get the autumn supplement, and those who werent notified are not getting it.

[Source: IMG_6550_english.txt] Broadly, there are three issues: 1. The ideological situation and the question of direction; 2. The achievements and errors of the large and small teams; 3. Issues with the leadership group.

Regarding the teams well-digging, work efficiency is low, there's no fighting spirit, which shows that the output is not great. I've been to all those places and there are problems; I hear things but no one steps in to stop them. This spring there were many bamboo shoots, but production was not great. Some brigade cadres are abusing their positions, using factory resources, getting haircuts, hanging out with friends, and spending money wantonly. There was a big push for land processing, but there was no plan, no blueprint, and opinions were not unified. The raising of productive livestock is not regular, there is no criticism, and it hasn't reached the year-end. The brigade cadres do not act in unison and are accepting food and gifts. The large and small teams are not working with spirit; when they issue instructions or lessons, no one listens, and it's not taken seriously. Team Two's land is not being cultivated (all of it is wheat); the brigade has discussed letting the small team plant wheat on half of it. Team One needs to get a tight grip on pig-raising and manage it at night; there is a problem with the sows. Team One's single-wheeled and double-wheeled carts need to be repaired quickly and put to use. It is still a mistake for Team One to use carts to pull up weeds from within the furrows. Team Three first talked about going to pull sweet potatoes with a sprayer, which is better than sheepskin bags.

Fertilizer Meeting, December 21, 1971. The brigade organized a daytime study session. Party (members) and workers who participated: Qiao Tingwen, Gao Chunjiang, Gao Chunchuang, Qiao Jierun, Tai Chuntu, Qiao Cangmang, Wu Guangliang, Wang Xingdao, Gao Baoliang, Liang Yunku, Qiao Tongsong.

Summary of discussion statements: Gao Chunjiang mentioned that there are too many meetings on the north side, and they can't keep up with the work in the fields, can't keep up with the two big teams on the west side which are unshakable. Because of the brigade, when you do ordinary work, the masses draw quite a few lines against me. It's just that I personally can't keep up with the situation. I can't fall behind in the work group, but I have no one to delegate to. There is no definite plan for the work. In my work, I thought I would just take the lead and do it, but I haven't managed to lead others. I am responsible. In land processing, I did not grasp the direction. The daily struggle sessions were not held tightly, the direction was not grasped, and the enthusiasm of the masses was not mobilized. The good were not praised, and the bad were not criticized. The time spent sticking to the work is short, and the great criticism has not kept up. I was up front in the threshing yard trying to stop it, then I heard Gao Yaozi had already come to take over, and then the person in charge of weighing at Team Two's yard was also stopped. To this day, some people still have a big historical backlash. My thought is, while in this position, to use the factory.

[Source: IMG_6551_english.txt] Gao Yingxian said, in keeping the cadres for a three-day intensive briefing to pass on methods, there were difficulties. I understand the least and have no way of innovating, so I just used the old ways and obeyed. There will be many slow starts and slow stops, and the masses have a history of reacting against this. My methods are slow, but there is a lot of positive momentum, and less time is wasted on fighting. In the midst of major opposition to slowness, there is little criticism of the majority.

Gao Yingyu, I have not played my part as a woman; it's just a title. On the land issue, I have not taken up the work with women.

Yan Ben said, I get anxious behind the scenes, but I have my reasons under control. As for whether the revolution is advancing or the roots are regressing, I still have it under control. As for whether the revolution is advancing or the roots are regressing, I grasp the mobilization but don't grasp it tightly.

Qiao Shoushun, as soon as you mention two or three households, the difficulties pile up. The broad masses of peasants are cherished and not much is taken from them. They just won't fight, afraid of getting their bodies hurt, afraid of provoking people. The well has never been used for irrigation. The second point is not convenient. So much has been done, but the contribution to the country isn't great, and the contribution to the masses has not been effective. Nothing has gotten off the ground, and I can't lead the way. The contribution to the country isn't great, the contribution to the masses.

Yan Xueliang said, I took office on March 2nd and have been in charge for one month in total. In leadership, Gao Xian wanted to assign people to the second counter-revolutionary group to make a last-minute effort, so I got to work. The three shifts in the second group were my idea. It's just too rigid, there's no way around it. Chairman Hai Zheng said, I stirred things up before, but later they didn't lead well, couldn't do the job, and if they weren't going to do it, they should let me step aside. Wang Xingdao said, this year's achievements are due to Chairman Hai Zheng letting me do the work, and my conscientiousness. Regarding the land issue and assigning people to the second counter-revolutionary group, I made a last-minute effort and got to work. I took the money and set it aside. Pulling our second group's three shifts together was my idea. It's just too rigid, there's no way around it, and it's not good to lead in the evenings. For weighing, there is a weighing clerk. The second group's people were making a fuss, so I stepped up. But Dai Wen, Chairman Hai Zheng said, I stirred things up before, but later they didn't lead well, couldn't do the job, and if they weren't going to do it, they should let me step aside. Wang Xingdao said, this year's achievements are due to Chairman Hai Zheng letting me do the work, and my conscientiousness. On the land issue and on education, I can't carry on. Is it that I'm not doing a good job, or that people are not being conscientious? No opinions have come down, so

[Source: IMG_6552_english.txt] What is the meat of the issue, and what are the bones? Regarding production enthusiasm, here are a few opinions offered without a formal meeting.

Wu Wenliang said: There has always been a mentality of dependency. After the land is prepared, people just leave it to fate. Later in the autumn, very few of the masses show up to work.

Gao Shiqi said: With the communal canteen, everyone eats together. When it comes to public versus private matters, people do what they please. They give special consideration to the women, which results in fewer people working. I don't have a solution, but I do have an opinion on it.

Evening Discussion

Gao Yujiang said: As for the peasants, after the land is prepared, the requirements for the young militiamen are not strict enough, and that's a factor. The young people are not motivated, and not enough effort is made to organize the old men. The issue isn't properly emphasized in meetings either. The brigade meddles in things it shouldn't, while the campaigns that should be pushed are not. The brigade's work is all slogans and generalizations. They look at certain model examples and hear "500 jin," and all they see are problems. In Team Two's grain group, a person who may or may not be up to the task was made group leader. Team One has two group leaders; one is a seasonal problem, and the other is a long-standing historical problem. These are common issues.

During the Qiaoguan harvest, Team One got 500 jin from their prepared land, while Team Two took everything. I heard that Team Two's 14 *ping* averaged 180 jin per *ping*, which was based on Team Two's total output. But their total output target wasn't met. So why did their 14 *ping* yield 180 jin? Team One expanded their 16 *ping* of old land by preparing it. I heard from Gao Shifu that Team Two's 14 *ping* yielded over 180 jin, but in the end, Team Two also only got a little over 160 jin.

[Source: IMG_6553_english.txt] Commune Accounting Meeting, December 22, 1971. Grain is to be deployed by the commune and brigades, with financial reports submitted for approval. Alternatively, calculations can be made down to the production teams with surplus grain, for which there is a policy. A total of 870 jin of grain has been saved, to be handled by the state bureau. This year's levels are to be compared with last year's. Production reports are to be submitted according to the official forms, covering cultivation, sowing, sideline occupations, and farmland water conservancy. Funds are to be designated for fertilizer selection. Distribution methods for livestock feed and seedling funds are to be discussed by the masses, along with policies for production materials for which no funds are to be retained, organizing the production of substitute shoe soles, and other sideline handicraft production. Grain subsidies for work-point compensation for missed work days and the division of labor are also to be discussed. The public welfare fund deduction should be more than the public accumulation fund deduction for each household. One cent will be deducted per labor day for each person until the total is paid off. If the accumulation is between 7.5 and 7, then 8 to 10 will be deducted. For labor requisitioned by the commune, the commune and brigades sheep will be paid for by the public welfare fund. The rights and interests distribution plan must be reported to the commune for instruction, or calculated into the production output and one copy reported to the commune. Workers employed outside the commune must return by December 15th. First, send the provisional report, then submit the summary table after receiving the final figures. For the remainder of the year: clear out the warehouses, and make up for shortfalls in the state grain levy with large and small soybeans. The processing factory will deduct a processing fee. For 1972, preparations should be made for drawing funds for mechanization. The final accounting and distribution must be completed before January 10th. This must be faster than just settling the books; the accounting must serve production. Self-report for the public welfare fund and resolve issues reasonably. The figures must be accurate; this is a work report to Chairman Mao.

Last year 2054. () 170.14. Per team 85.1673.1.5 complete.

Notice: meeting was yesterday, report tomorrow and hand in reports. County-wide education conference on the 6th, which is tomorrow. It will last 8 days, 10 days including travel. One comrade to attend each time, either a deputy director or someone from the brigade organization. Representatives: 8 from famous schools, poor and lower-middle peasants, teachers, comrades.

Can be changed to a night school. The annual meeting will start from Jan. 7, 1972. Fill in date of birth using the Gregorian calendar in numerical format. Newborns without household registration will not be reported. To raise a cow, you must have a source of fertilizer. Pig farming must meet the average level.

Agriculture learns from Dazhai. Clerks go to the finance meeting. Number of machine units: 1. Original militia in '71, cadres and regulars: 2. Current militia in '72, cadres and regulars. How many new recruits? Number in armed forces? Number who have left the team? Number purged? Number of deaths? How many discharged from service? Number moved out, moved in. Number of core militia members. Actual number of militia members in '70: 129.

[Source: IMG_6558_english.txt] 3246.2.233.

Before winter, grass was cut twice. In December of '71, who was there to pull the cart and handle the livestock? As for her, when grass was cut in the summer, the people did not return. The next year, no grass was cut. When going to work, no one needed to be sent to the assigned plot. My work, I did. Your work, you pulled. At night, they came looking for me. Seeing that others weren't coming back, I didn't come back either. In the autumn, when carrying stone for the commune, it wasn't a matter of who carried for the small building or who carried for the big building.

Credit Cooperative holds a meeting. 72.1.7. Border Region Agricultural Loan Regular Small Group. A production team committee of Poor and Lower-Middle Peasants was formed with a 5-person group. An accountant and a treasurer were selected from the group, and a group leader was chosen and reported to the commune. Made a feasible income and expenditure plan for '72. Worries even about lamp oil and ink. The hundred-branch production income and expenditure flow has not yet been filed. No discussion with existing households about the team's borrowed and disbursed funds. Being passive won't work either. Before the meeting, disbursed funds were returned and paid in full. Poor and Lower-Middle Peasants, due to hardship, can take a portion of the processing fees but cannot disburse funds. Those who love the team cannot disburse funds. Credit loans are disbursed by the Credit Cooperative. Report the forms once every 10 days. 73.12.27. A production team family cannot hold more than 20 yuan in cash (assigned households with cash cannot exceed 100 yuan). For large expenditures, a unified plan must be made first. On the 28th of every month, go to the Credit Cooperative for a one-day meeting. Report the team's work situation for the month truthfully, including any changes. Living expenses, production expenses, fund disbursements, miscellaneous expenses. Lamp oil 2 jin, one bottle of ink. One candle for midday and evening. One bottle of wax paste.

[Source: IMG_6561_english.txt] Notes from the county telephone conference. Tomorrow afternoon, the accountants will go to the commune for a meeting. 1. Urgently and properly manage the study sessions. Conduct the year-end summary and evaluation. 2. Year-end final accounting. Have people deliver the funds, concentrate our efforts, and go all out on the final accounts. This must be completed within three days. If they get too busy, the secretaries and accounting staff should all help out. For the year-end distribution, the books must be calculated in detail, down to the last cent. If any problems are discovered, they must be dealt with promptly. There must be a clear account of expenditures; everyone must know the numbers. "He says three thousand, she says ten thousand" won't do. The idea of "taking grain as the key link for all-around development" but only focusing on water-related tasks and not on drought-related ones, saying we'll deal with it tomorrow that's a living ideology.

. The name lists of all personnel from every brigade are to be reported to the commune. . Teacher reassignments: arrange the school's work properly. Substitute teachers must be found and arranged for all necessary positions. Everything must be settled before the 18th. . Maintenance of mechanized wells and agricultural machinery. Resolve any ideological and technical issues. Each team needs 3 people. Report the name lists to the commune, either tomorrow or tonight! . Long Jianguo is to be reported to the commune immediately.
