

DORLELETTERS1965 L0008 (English)

Bruff, Aug. 14/65

Dear Mom, So, nothing will come of the move on September 1st! We are very sorry, but if she gets a permanent position, then it will probably be worth it. It starts on September 1st & as a supervisor at a new school, so she might have a good position, because the man is north of Vancouver. One of many school principals and \$6000 dollars a year, as far as I know. Now he is not disturbed. But now it means waiting again, until there isn't much to see there yet, because we renovated right when we moved into our house. A house, a room that looks so wonderful, that is truly our pride and joy. Besides that, we have at least an extendable table, which we were able to build and varnish in the basement. Please, tell them at your place if she could perhaps put a note with you, and a request for me, if you still have the boxes, please write down the numbers that are on them for me. And please Color II (110-125/240 V) The battery, which is very bad, has the number R3716 (4-4-59) Sonnerocchein). The device is a Unith-blitz Fabrik No. 8580. These are all numbers that are on it, but maybe not with the factory number, but on there. It's not a big deal, but it would probably be useful. Warmest greetings to all of you, your son and daughter-in-law, grandchildren and great-grandchildren.
